A week in your own town. \$5 Outfit free. No risk. Reader if you want a business at which persons of other sex can engage, great pay all the time they work, write for particulars to Hallott & Co., Portland, Me.

## THE INSANE ASYLUM AT RALEIGH.

### ASYLUM FOR THE INSANE.

RALEIGH, N. C.

The above cut represents the Insane Asylum for North Carolina, located one mile west of the Capitol at Raleigh. It is a building of very imposing exterior. The foundation is of granite and the superstructure of brick, stuccoed, and is covered with a tin roof. It has a centre building 80 by 120 feet, four stories high, with an observatory on the top at an elevation of 110 feet from the basement floor. On the fourth floor are water tanks of boiler plate, having a capacity of 15,000 gallons, which are refilled daily by steam power from Rocky Branch, a stream running through the grounds.

From the center the two wings extend nearly north and south, each 323 feet, making the entire length of the building 726 feet. The wings are three stories high, measuring 45 feet to the attic, and are forty feet in width, including rooms, corridor and walls.

The floors are of the common long leaf pine, of rather inferior quality, and are now becoming much worn and need repairing. Much of the wood work of the building seems to be composed of lumber not well seasoned; the brick work of good and bad material in about equal quantities. The walls, as above stated, are stuccoed on the outside and plastered inside in good style. The granite foundation by Messrs. Colburn and Stratton was well and thoroughly done in its execution. The original heating apparatus, by Mr. Nason of New York, has been superseded by later and better improvements.

The basement of the entire building is occupied by the heating apparatus, sewer pipes and air-ducts. The heating and ventilation is accomplished by passing air over radiators containing steam, which then passes into the rooms and corridors through flues in the walls to the attic. The ventilation is regulated and equalized by a large fan, propelled by steam power, located in the main air-duct near the boiler. The sewerage is conducted from the building through cast iron pipes running under each wing and connecting under the center building, and the water closet ventilation is effected (though imperfectly) by a connection of the sewer pipes with the main stack at the boiler house in the rear. The entire building is lighted by resin gas, manufactured on the premises.

Each wing is divided into six wards for classification in the treatment of patients. Each of these wards contains 20 single rooms for patients, rooms for attendants, and stove rooms. The accommodations of the institution are for 224 inmates, but by crowding to its utmost capacity it now contains 275 inmates.

It is well worth a trip to Raleigh just to visit the Asylum and see how systematically matters are arranged for the convenience and comfort of the inmates and attendants. One would have no idea of the very considerable amount of machinery employed. In case of an alarm of fire the large tanks spoken of before will furnish an ample supply of water to flood the floors of the whole building in three minutes, and then as steam is kept up at the boiler house all the while, both night and day, the pumps

can be instantly set at work to furnish new supplies in case there should not be enough on hand. Steam being cut instantly on hand, it is used extensively in cooking—especially in steaming vegetables. The farm in connection with the grounds is kept in a high state of cultivation, and an ample supply of vegetables are raised for the use of the asylum buildings.

From a report made by the superintendent to the Directors a few days ago we extract the following:

"Since the annual meeting, fourteen new patients have been received, and eleven discharged—of which there have been six deaths. The whole number of admissions since the opening of the Institution in February, 1856, has been twelve hundred and forty. Of these three hundred and fifteen have been cured; one hundred and twenty-seven discharged improved; one hundred and eighty discharged stationary, and three hundred and thirty-four died, leaving now upon our books two hundred and eighty-one. This number overcrowds our wards, originally intended to accommodate two hundred and twenty-four only.

"The finances of the institution can be seen by reference to the Treasurer's report. The expenditures for December last, the first month of our official year, amounted to \$4,031.47; for January, \$6,230.84, and for February, \$3,302.33.

The first act of incorporation of the asylum was passed by the legislature of 1848, and appropriated \$80,000. The success of the movement was mainly through the personal influence and exertion of Miss D. L. Dix, whose whole life has been devoted to the alleviation of the sufferings of this class of our fellow creatures, both in this country and Europe. Her presence and efforts everywhere aroused sympathy in behalf of the insane, and accommodation for their comfort and cure. Through her efforts the Pope erected a magnificent institution for the insane in Rome. The British Ministry was induced by her to correct abuses in the treatment of the insane in Scotland. The Lord Lieutenant who refused to hear her was summoned by the Premier to his presence and reprimanded, and the acknowledgment of her services was wrung from the reluctant lips of the House of Lords by a Peer, who exclaimed: "It is to our reproach that we have been aroused to the existence of wrong, and instigated to the performance of duty in matters of charity, by a foreigner, and that foreigner an American, and that American a woman, and that woman a Dissenter!"

Soon after the passage of the first act in 1848 by the legislature of our State the commissioners were organized by the appointment of Governor Morehead as chairman, and they set to work in the erection of the building. Appropriation after appropriation was made from time to time, as required, and the building was finally completed at a cost of \$300,000. The first patient, Andrew M. Helderly, from Rockingham County, a soldier in the Mexican War, was admitted on the 22d February, 1856, more than seven years after the act of incorporation.

The superintendency was first conferred to Dr. Edmund Threlwick, of Hillsboro, who accepted it only temporarily. He was succeeded by Dr.

Edward C. Fisher, of Virginia, on the 1st day of October, 1853, as Superintendent of Construction and Medical Superintendent, and he continued to hold the position until the 7th of July, 1863, when he resigned, and was succeeded by the present incumbent, Dr. Eugene Grissom, of Granville County. The other officers of the institution at present are: Dr. F. J. Fuller, assistant physician, who has held that position and faithfully performed its duties continuously since his election in 1856; James H. Moore, steward, who is now filling the position for the third time; Mr. M. A. Lawrence, the efficient matron, who has occupied the place most acceptably for ten years, and James S. West, engineer, who was elected at the annual meeting of the Board of Directors in December last.

We might say much of the beautiful location of the institution on "Dix Hill," the ornamentation of the grounds, &c., but the length of this article prevents this for the present. The Insane Asylum is one of our grandest State charities, and ought to be cherished and sustained by our legislature.

Among the numerous testimonials of Dr. Grissom's efficiency the following letter is selected from the celebrated philanthropist before mentioned, Miss D. L. Dix:

To Eugene Grissom, M. D., Sup't of the Hospital for the Cure and Care of the Insane of North Carolina.

Sir: I cannot leave your Institution in which as the guest of the State and of your family, I have spent so many days in observing the conduct of all the affairs which affect the well being of the patients committed to your care, and not express my great satisfaction. Not only do I find you earnest and active in promoting the comfort of the Insane and applying all the means at your command for their restoration, but I see everywhere evidence of vigorous measures for improving the buildings and bringing your grounds and farm into higher cultivation for the advantage of the inmates, while you, at the same time, keep in view a just regard for the interests of the State, of which you are an officer in trust. Your sense of duty has been joined with a discriminating judgment in the choice of officers and employees, who work in concert and harmoniously in all the departments of the institution within and abroad. I especially congratulate you in the earnest and constant devotion to the welfare of your patients found in your friend and assistant Dr. Fuller; the affection and respect which all manifest for him is the surest evidence of his merit. Your success, Sir, under the very embarrassing and difficult circumstances accompanying your first action in the State Hospital, is as remarkable as it is gratifying, and is an augury of continued and increasing prosperity.

With esteem and just appreciation,  
D. L. DIX.

It is said that the best garden seeds for planting are those that are raised from seed sown late, after the weather has become warm. The reason of this is claimed to be that plants which are sown late comes to maturity more rapidly than those which are sown early and before the ground is warmed by the sun; also, that the seed of such plants will develop itself sooner than that of others. This is an important fact to those who wish to have garden vegetables.

### A Man who Proposes to Light Streets and Dwellings with a Wire.

About two years ago Mr. J. B. Fuller invented and exhibited an electric machine for telegraphic purposes. It then occurred to him that the same apparatus might, with some changes, be made to produce an electric light, and, after considerable labor, perfected his invention. It was in operation on Saturday evening in the rear of Maltby's oyster depot, at 11 Greenwich avenue. A small steam engine furnishes the motive power for the machine, which is very simple, consisting of an armature revolving between the poles of a powerful electro magnet. A strong current of electricity is thus generated. Two electric wires are attached to the machine, and they convey the electricity to the various burners. Each of these burners consists of two sticks of carbon separated by a piece of glass, which are attached in an upright position to the wires. The electricity is ignited by the application of an ordinary piece of metal to the burners. The light thus produced is dazzlingly brilliant and very beautiful, so far surpassing the ordinary gaslight that the latter looks yellow and dirty besides it. Any number of lights may be supplied by the same wires, and Mr. Fuller has succeeded in so subdividing the current of electricity that any one of the lights can be extinguished without affecting in the slightest degree the other lights on the same circuit. This had not been accomplished before. Mr. Fuller says he can light buildings in any part of the city by extending his wires to them through the streets. He also says he can light the streets with electricity, and to prove this he has stretched his wires to a post on the sidewalk in front of the building where he keeps a light every evening. This light is far more brilliant than any calium light, and illuminates the street for a block. One of these lights would illuminate a whole block, and far better, too, than a dozen or more of street lamps. In lighting up a house, porcelain or ground-glass shades are used for softening the glare of the light. The cost of production is very slight, much less than that of the ordinary gas.—N. Y.

SLIGHTLY MIXED.—Oh, it was a terrible runaway! You see an umbrella was carrying a man and it frightened a buggy and it started to run off with the horses and they ran over on the lamp-post and knocked the sidewalk down and upset a little baby who was carrying his mother in her arms and struck some apples and knocked all the apple women out of the peanut stand and then went down the lightning like a street and knocked three spokes out of one of the horse's hind legs and took the hide off the wheel and I fell out and run a mad-puddle into my head clear up to my shoulders and the mud got full of my mouth and ears and eyes and I'll never get over it and it's awful.

The Rural World says: "If you want to keep hogs, horses, cattle and sheep healthy, give them salt regularly. There is no better vermifuge than salt. Much of the so-called hog cholera is due to intestinal worms. Plenty of salt would prevent the accumulation of these worms. All animals desire salt, showing that it is a want of their nature, and undoubtedly for wise purposes."

### Eastern N. C. Enterprises.

News Item, April 15, 1878.

Raising early vegetables for the Northern market is a business of considerable magnitude in this neighborhood. Green peas and potatoes constitute the bulk of the crop, but snap-beans, cymblins, cucumbers and tomatoes are also shipped in large quantities. The season, with the exception of a slight hail storm on the 11th inst., has been on the whole, a favorable one, and the promise, both as to yield and profit to the truckers, is, at this time, very encouraging. It is estimated that the shipments of vegetables from Newbern this Spring will amount to upwards of four thousand (4,000) barrels. Strawberries seem to be neglected here, Goldsboro apparently having the monopoly of the cultivation of that fruit in this region. Facilities for shipment are very good, both by land and water, there being, besides the railroad route, a semi-weekly line of steamers to the Northern cities. The "truck" sent from this section of country is held in high estimation wherever it is known. Succeeding as it does, that grown in the vicinity of Charleston, to which it is preferred, and anticipating that from Norfolk, its comparative nearness to market enables the consumer to obtain it in the best possible condition, which usually secures for the shipper a profitable return.

In the country also, along the line of railroad between this and Morehead City much attention is given to truck gardening, the shipments to the Northern cities during the season being almost equal to those from Newbern. Near the seacoast, however, watermelons seem to be the favorite crop—the fact that one farmer near Newport plants fifty pounds of seed, giving some idea of the extent to which they are cultivated. These melons are shipped North by the cargo—small schooners adapted to the business being chartered specially for the purpose.

The first green peas sent from Newbern this season were shipped by Mr. John Haley on the 11th inst. Mr. H. is one of the largest and most successful of the truck farmers hereabouts, and his crop is perhaps more varied than that of any other.

### MANUFACTORIES.

Among other manufacturing establishments here the "Carolina Cedar Ware Works" will be found interesting, especially to one who has a fancy for neat mechanical operations. The establishment is owned and managed by Geo. Bishop, Esq., and is devoted chiefly to the manufacture of buckets, pails, "piggins," "keelers," et al omne genus. White cedar, or juniper, as it is more commonly called, is the wood principally used, but considerable quantities of red cedar are worked up also. The capacity of the factory is three hundred dozen buckets per week; at present, however only about eighty dozen are turned out in that time. The juniper logs are bought mostly in the neighborhood of this city. These are cut by a circular saw into billets of equal length, according to the kind of vessel desired. The billets are then taken to a saw of peculiar construction, being a hollow cylinder of steel with teeth at one of the ends, both of which are open, which saws them into staves of uniform thickness, and gives them the slightly concavo-convex shape required by the circular form of the pails. The staves and bottoms are next placed in a dry house or kiln, where they are subjected to a high degree of heat about 180 degrees Fahrenheit, for four days and nights, or until thoroughly seasoned. The capacity of this kiln is sufficient to "dry out" the material for 150 dozen pails at a time. When brought from the kiln the rough staves are trimmed lengthwise by a saw so placed as to shape them wider at one end than the other, next, by means of two saws arranged at the ends of an axle; they all are cut exactly the same length. They are then tongued and grooved by machinery, and the pail is ready to be put together. The staves are then formed into a pail, as yet without a bottom, by means of an iron frame made for that purpose; from this it is transferred to a lathe, the outside turned and sand papered smooth, the top hoop put on and run securely into place by a new and perfect instrument. Another workman then takes the pail, places it in a second lathe

and turns and sand papers the inside perfectly smooth, the same instrument that does the turning, cutting also groove at the lower end of the staves into which the bottom is to be fitted. While still in the lathe the ends of the staves are beveled with a spoke shave and sand paper, and the bottom which has been previously turned upon a separate lathe is put in place by hand. Two other hoops, there being three to each pail—are then put on, the middle and bottom hoop requiring each a separate machine for placing it in position. The hoops are made of brass, but galvanized iron can be used if expressly ordered, and as the use of the latter lessens somewhat the cost per dozen of the pails or buckets, such orders are sometimes received. Owing to the shape of the pails, the hoops must be cut in different lengths, which is done by shears specially arranged, and connected with them is a machine for punching the rivet holes.

After the hoops are put on, the pail is again placed in a lathe, to which very rapid motion is given and is made smooth as velvet by sand paper then brightens the hoops to the last degree, and nothing now remains to be done but to put on the handle. The "bails" or handles, cut from copper wire, are bent into shape by a very ingenious machine; another bends the ends so as to catch in the "ears" at the side of the pail which "ears," stamped out of sheet brass, are then fastened to the pail with copper tacks, the fastenings being done on a frame so arranged that the ears cannot be improperly placed, and the pail is finished. The pails are then packed and wrapped in nests of half dozen each and are ready for shipment. They are very humble implements of common and daily use costing only a trifle, yet before their completion they pass through the hands of seven or eight workmen.

The wares of this factory excellent of their kind, find a market principally in New York and Boston through a few of them are disposed of in Raleigh and Wilmington. Freight on goods of this kind from Newbern, to most towns in the State being less than from Northern factories or cities, and their price the same or less, it would seem that dealers could purchase to better advantage here than elsewhere. It would be no many accounts desirable if the factory could be kept constantly at work to its full capacity.

CONGRESSIONAL WRIT.—One afternoon, when Garrett Davis was taking a snooze in his carule chair, his next neighbor gave him a punch in the ribs, and said: "Wake up, Senator, your name has been called." Half asleep the Kentuckian rose and asked the Vice-President, who was in the chair, what the vote was on. The Vice-President gave him the name of the bill, which was for the benefit of a Kansas railroad.

"Ah!" exclaimed Davis, now wide awake, "but I want to know, before I vote, the amount of stealage in this bill?" Whereupon a Senator who was engineering the bill, a portly man, whose conscience irradiated his countenance, rose and said in meek tones: "If the Senator from Kentucky will permit me, I will state that I have thoroughly examined this bill, and I assure him that if it contains any opportunity for stealing I cannot find it."

"All right, Mr. President," responded Davis in his shrillest tones, "if the Senator cannot find any stealage in the bill, I am sure there can be none there. I vote aye!"

Here is what a correspondent of a Northern paper writes from the South: "Cotton yarns and brown cottons are manufactured in the South, yet I was told that the agencies of the Southern mills are uniformly in New York and the North, and the goods return to the population which made them after 2,000 miles of movement." How long is this sort of thing to continue? The staple is grown in South, the yarns are manufactured in the South and should be sold in the South as far as the consumption of the article requires it. Did you ever catch a Northern manufacturer or dealer doing business after the style indicated in the quoted paragraph? Is it any wonder we are poor? Is it any wonder that the South is a tail appended to the Northern kite?—Star.

The New National Party

Our Warm Springs letter, says the Raleigh Observer, makes inquiry as to this new organization, of which we have made occasional mention. The party, as well as we can understand it, as a product of a union between what is known as the Greenback element and the labor societies of the North and West. So far as we gather its objects, it is stated that the National party asserts that Government alone should issue money, and make its gold, silver and paper a legal tender for all debts, public and private. This of course involves the withdrawal of the National bank circulation, and the coining of silver under the regulations which affect gold. Congress is to make the supply of money sufficient to keep the labor of the country employed at good wages, and although no very definite methods have yet been suggested for bringing about this consumation, something has been said of a minimum per capita circulation, and of the regulation of the value of money and of the rate of interest at law. The Nationals further insist upon the taxation of Government bonds and the levy of a "graduated income tax," the rate of percentage to increase with the increase of the income. The Nationals denounce the granting of the public lands to corporations on any pr. These lands, they hold, must be given away to actual settlers in "limiting quantities." The members of the new party also demand that Government shall encourage, by general enactments, the development of our various National resources, to the end that labor may be profitably employed. The call for economy and the abolition of useless public offices; proclaim the necessity of shortening the hours of toil among the working classes; oppose the introduction of the contract system into prisons, and urge the suppression of "the importation of servile labor into the United States from China." The general objects of the "National" movement are summed up in the tenth resolution of their platform, which declares that the "adoption of an American monetary system, as proposed herein, will harmonize all difference in regard to Tariff and Federal taxation, reduce and equalize the cost of transportation by land, distribute equitably the joint earnings of capital and labor, secure to the producers of wealth the results of their labor and skill, muster out of service the vast army of idlers who, under the existing system, grow rich on the earnings of others, and permit every man and woman, by their own efforts, to secure a competence, so that overgrown fortunes and extreme poverty will be seldom found within the limits of our republic."

The Negroes Who Want Working

The Baltimore Sun says: "The negroes are to hold a convention at Charlotte, N. C., on the 16th of September next, the object of which is to petition the law-making powers of the country to restore the whipping post for stealing and other grievous offenses. Stephen McCorkle, a colored man, is at the head of the movement, and he says there will be delegates from several of the Southern States. Of course the white criminals of the like sort would come in for whippings also—which kind of reconciles the blacks to it. This is the case in Virginia, Delaware, etc. To the States it saves much, in not having to maintain so many petty offenders in prison."

The Price of Cotton in 1840

Speaking of the low price of cotton, Mr. William Caldwell, of Alexandria, this county, informed us yesterday that about the year 1840 he made six bales which he hauled to Cheraw, S. C.—over a hundred miles—in a wagon and sold for \$4.00 per hundred. He agrees with us when we say that the price of cotton is not so material as is the relative value it bears to other articles.—Charlotte Observer.

Fatal Accident

We are sorry to hear of accident which happened to Mr. Robert Steele, a very worthy citizen of Union County, N. C., and who lived just over the boundary line of this county on Tuesday last week. While riding on the top of a load of fodder the wagon wheel struck a stump in the road which threw him off, breaking his spine. He has been paralyzed ever since. No hope is entertained for his recovery.—Lancaster Ledger.

The Telephone

The telephone has been introduced in Statesville, and the citizens order their drinks through it instead of walking for them. It is currently reported that the telephonie is kept some what busy.—News.

THE EASTERN WAR.

The War Imminent—England Determined to Fight—The Russians in Constantinople.  
LONDON, April 24.—The Standard announces that twelve Russian engineer officers, who were recently at Rome, have started for the Suez canal and the Persian gulf.  
It is announced that the German Ambassador will visit the Marquis of Salisbury at the Hatfield House today.

The Standard's Vienna Correspondent

The Standard's Vienna correspondent hears that Russia, fearing the Turks will permit the English to occupy the forts on Bosphorus, in event of war, has asked Germany to guarantee a line of demarcation during the negotiations. Prince Bismarck is considering the request.  
A letter from Bucharest reports that the Russians have unsuccessfully attempted to destroy the powder factory at Bucharest. Twenty persons were killed. The report is not credited.

The St. Petersburg Correspondent

The St. Petersburg correspondent of the Times telegraphs the following: The report that Prince Bismarck intends to abandon all further attempts at conciliation is not believed in well informed circles. But little confidence is placed in the ultimate success of the negotiations.  
The Journal de St. Petersburg is also dependent about the result of the negotiations.  
The Agence Russe confirms the report of the return of the Grand Duke Nicholas.

WHAT TILTON SAYS ABOUT HIS WIFE'S CARD

St. Paul, Minn., April 19.—Theodore Tilton lectured at New Hampton, Iowa, last night. After the lecture he made a statement to a reporter of the Globe in this city, in which he says that Mrs. Tilton's card was a surprise to him, and that he had no agency in the matter. He added: Mrs. Tilton has made no overtures to me for a family reunion, nor have I made any to her, nor have our two daughters ever made such overtures to either of their parents. What Mrs. Tilton's future plans are I do not know. Whether she is to live in Brooklyn I do not know. The story that Mrs. Tilton is to accompany me to Europe, or that there is to be a reunion of the family on my return, is a fabrication.

Accidental Hanging

Thomas, a son of Mr. J. A. Bookham, aged some fifteen years, and living in the vicinity of Pleasant Grove, Alexander county, met with almost a fatal accident a few days ago. Having gone in the basement, which is used for the cooking department, early in the morning for the purpose of starting a fire, and after doing this he observed a bank of thread hanging in an open manner to a sleeper of the building above, which reminded him of the halps through which he had seen circus performers jump, and thinking he could go through some of their pranks, at once commenced the exercise. Unfortunately, after amusing himself for a short time, he made a misleap in which he caught his chin in the loop, and the bank giving a sudden twist, had him completely fastened by the neck. About that time his little sister entered the room and finding him in this dangerous attitude, tried to relieve him, but finding herself unable, ran up stairs and related the sad story to her father, who hastened to the scene and secured an axe with which he rescued the suffering victim. Life was not altogether extinct, but it was several hours before he recovered his natural senses.—Statesville American.

A Religious Sensation

New York, April 21.—A special dispatch from Paris to the Herald has the following from a person who professes to have an intimate acquaintance with the Vatican: "I hear that a movement is on foot which promises to be the most important event in the religious history of this century. This is nothing less than secession in large bodies of the members of the English Protestant Church to the Roman Catholic Church. The number of seceders is placed at as high a figure as 3,000,000 of people. Included in this exodus from the Church of England are bishops, rectors, curates, and deacons. Authorized delegates, it is ascertained, are now in Rome negotiating conditions upon which secession will take place.  
There are 127 orphans in the Oxford asylum.  
The Eastern outlook does not improve. England appears to resist all plans at adjustment and is thought to be bent on war. Prince Bismarck is still engaged in trying to arrange matters peaceably, but it is not thought he will succeed.

Trinity College Commencement

will be June 12th and 13th. Gov. Colquitt, of Georgia, will deliver the literary address. Gov. Colquitt is not only a Governor of rare excellence and ability, but is a gentleman of elegant culture, and one of the finest speakers in the South.  
The next commencement, June 11, 13, will be the twenty-fifth. In commemoration of the passing away of a quarter of a century since the foundation of the College, it is intended to hold a grand meeting of the Alumni. These will assemble on Tuesday, June 12, at 11 o'clock A. M., and on Tuesday and Wednesday evenings. An immense meeting of the Alumni, with their wives, and children is expected.  
Mr. T. R. Parnell of this city, has been selected as the biographer of the class of 1880. The reunions of former school-fellows are always deeply interesting, and productive of a host of pleasant memories of the "hazy" days.—Rat. News.

Ho for Liberia

At last, after long delay and much doubt, the Liberian emigrants have started to the land of their fathers. The ship Azor left Charleston Sunday, the 21st instant, with two hundred and forty-six emigrants on board. It is said by those who saw them that they are as a general thing superior to the average negroes of the States. This is evidenced by the fact that though they have been kept in Charleston for months at their own expense and with nothing to do, only one has been detected in any crime, and by the additional fact that they had some property of their own and funds to pay their way. Only a portion of those waiting could go on the first trip. We cannot help feeling a sort of admiration for the courage of these people who go to try their fortunes amid scenes written and unknown. Much has been written on the subject of the exodus. Many varied and contradictory stories have been circulated regarding Liberia. The truth seems to be that very little is known of it. The Charleston News and Courier, considering the great interest taken in this exodus scheme, and wishing to throw as much light as possible on the subject, has sent Mr. A. B. Williams, one of its most faithful and trusty staff reporters with the Azor, in order to give the country a true account of the voyage and a description of the country where the emigrants are to settle. The general and almost universal impression is that the emigrants are going to their destruction; that they would do much better here.—Newberry Herald.

VEGETINE

FOR  
Chills, Shakes,  
FEVER & AGUE.  
TAMMONG, N. C., 1878.  
Dr. H. R. STEVENS—  
Dear Sir: I feel very grateful for what your valuable medicine, Vegetine, has done in my family. I wish to express my thanks by informing you of the wonderful cure on my son; also, to let you know that Vegetine is the best medicine I ever saw for Chills, Shakes, Fever and Ague. My son was sick with malarial fever, which left him with the Hip-joint disease. My son suffered a great deal of pain all the time; the pain was so great he did not sleep but cry. The doctor did not help him a particle, he could not lift his foot from the floor, he could not move without shrieking. I found your advertisement in the "Louisville Courier-Journal," that Vegetine was a great cure for Chills, Shakes, Fever and Ague. My son was sick with malarial fever, which left him with the Hip-joint disease. My son suffered a great deal of pain all the time; the pain was so great he did not sleep but cry. The doctor did not help him a particle, he could not lift his foot from the floor, he could not move without shrieking. I found your advertisement in the "Louisville Courier-Journal," that Vegetine was a great cure for Chills, Shakes, Fever and Ague. My son was sick with malarial fever, which left him with the Hip-joint disease. My son suffered a great deal of pain all the time; the pain was so great he did not sleep but cry. LOCAL

We give on our first page this week an engraving of the Insane Asylum at Raleigh, together with an article in description of it.

Pleasure for the Young We learn that the young folks of Monroe will have a picnic on next Wednesday, the first day of May.

Burning We learn that a shoe shop belonging to Mr. Joel Horn near Long Pine in Anson Co. was burned down one night this week. It is supposed that it was set on fire after being robbed. Suspicious are had as to the perpetrator.

Off for the Pen. On last Tuesday Deputy Sheriff Preslar carried to the penitentiary the following convicts sentenced by Judge Moore at our recent Court, viz: Dan. White, larceny, four years; Jas. Horton, larceny, two and a half years.

Law Card. We call attention to the law card of Mr. Jas. F. Payne, who is now occupying the office recently vacated by Dr. Ramsay. The reputation Mr. Payne has made for himself as a lawyer of ability, since he settled among us, render any word of commendation from us entirely unnecessary.

The Womble Verdict. Just as we go to press, a special despatch from Wadesboro tells us that the Jury in the case of State vs. T. H. Womble for murder, rendered a verdict of "Not Guilty."

Address. Prof. J. F. Latimer, of Davidson College, has accepted an invitation to deliver the Commencement Address before Monroe High School, in June next. Those who are acquainted with the Professor assure us that something very fine may be expected on that occasion.

Reported Murder. For the past two weeks we have heard rumors that a Mr. Morgan, living in Stanly County near Rocky and Pee Dee Rivers, had killed his wife, but we have not been able to obtain a straight account of it. In fact, as there are so many conflicting rumors, we are inclined to believe there is no foundation for them.

Dissolution. By adv't in this issue the public are informed that the law firm of Adams & Payne have dissolved partnership. Mr. Adams returns to the office in the Court house which the firm formerly occupied, while Mr. Payne remains at the office near Copwell & Son's store, to which the firm moved a few weeks ago.

Pardoned. On last Wednesday, on the petition of some four hundred citizens of this county, presented by H. B. Adams, Esq., His Excellency Gov. Vance granted a pardon to Wm. Holly, of this county, who has been in the penitentiary for twelve months serving out his term of ten years for manslaughter, having killed Geo. Mills at a corn-shucking frolic in Lane's Creek township in 1876. Holly returned home on yesterday.

Can't Go. With pleasure we acknowledge the receipt of an invitation from Dr. R. V. Pierce of Buffalo, N. Y., to attend the Reception given by him to the Press of the U. S. on next Monday at his mammoth Invalids' and Tourists' Hotel, being the occasion of the opening of said Hotel, for the accommodation of his patients. Owing to the extreme scarcity of funds, and want of time, we shall have to decline Dr.'s kind invitation.

Notice. The citizens of the several townships in Union County will meet at their respective voting places on Saturday, the 11th day of May, to appoint delegates to a County Convention, which will be held in Monroe on Saturday, the 18th of May, for the purpose of appointing delegates to the District Convention, which meets in Charlotte on the 22d of May to nominate a Solicitor for this Judicial District, and also recommends a suitable person to be nominated by the State Convention for Judge of said District.

W. H. FITZGERALD, Ch'n Ex. Com. Union Co. April 19, 1878.

Poisoned. We learn that a colored woman, Barbara Rowrie, in Anson county, died rather suddenly on last Sunday, under suspicious circumstances. Dr. A. Myers analyzed the stomach, and decided that she had been poisoned. Our informant could not give us the particulars, but stated that an inquest had been held; and we will likely get the full particulars in a day or so.

The Superior Courts of the Fifth Judicial District—Judge Moore presiding—are held as follows: At Monroe, Union Co., on Monday, April 28th.

Wadesboro, Anson Co., on Monday, April 28th. Reekingham, Richmond Co., Monday, May 8th. Fayetteville, Cumberland Co., Monday, May 20th.

Means vs. Shettyell. Quite a spirited correspondence between Capt. R. A. Shettyell and Col. Paul B. Means, the manager of Judge Schenck's canvass has been published from time to time in the Raleigh papers. Owing to their great length, we have not been able to give them a place in the ENQUIRER, and besides we consider that it is quite unfortunate that the subject was ever opened again, and that now the least said about it, the better. We are of the opinion that Judge Schenck has lost considerably at the hands of his friends.

Mecklenburg Presbytery. SECOND DAY. Presbytery met at 9 A. M., and spent half an hour in devotional exercises. The greater part of the morning was spent in hearing reports from the Churches. The call from Wadesboro for the services of Rev. R. A. Miller for one half his time, mentioned in our last issue as having been docketed on the first days' meeting, was placed in his hands.

The Presbytery appointed a commission to ordain and install Rev. W. M. McGilvary, to meet Friday before the 1st Sunday in June, at 11 A. M., at Rutherfordton. The commission shall consist of Revs. W. H. Davis, J. P. Gammon and R. A. Miller, and Elders J. A. Miller and A. B. Long. Rev. W. H. Davis to preside and deliver the charge to the pastor, and Rev. J. P. Gammon to give the charge to the people.

The installation of Rev. J. P. Gammon is to take place on Saturday before the 4th Sabbath of September, at Asheville at 11 A. M., Rev. J. F. Latimer to preside and preach, Rev. S. H. Chester to deliver the charge to the pastor, and Rev. E. H. Harding to give the charge to the people.

The following were unanimously chosen commissioners to the General Assembly. Principals—Ministers—Revs. S. T. Martin and S. H. Chester; Elders—Gen. W. L. T. Phipps and J. C. Kuykendall.

Alternates—Ministers—Revs. G. D. Parks and J. J. Kennedy; Elders—J. C. McLaughlin and J. G. Potts. Candidate W. B. Arrowood stood a satisfactory examination, and was licensed as a probationer to preach the gospel.

Religious services at night were conducted by Rev. J. P. Gammon. The appointments for public services on the Sabbath were published in our last issue, but were somewhat changed after being furnished the printer. The following was the order of services as carried out:

Presbyterian Church—Rev. J. F. Latimer in the morning; Rev. R. Z. Johnston in the evening; administration of Sacrament by Revs. W. H. Davis and W. E. McIlwaine.

Methodist Church—Rev. G. D. Parks in the morning; Rev. W. M. McGilvary in the evening.

Episcopal Church—Rev. E. H. Harding in the morning; Rev. S. T. Martin in the evening.

Baptist Church—Rev. W. W. Pharr in the morning; Rev. W. R. Kirkpatrick in the evening.

Colored Presbyterian Church—Rev. W. B. Arrowood in the morning; Rev. S. C. Alexander in the evening.

PUBLIC SERVICES. We were held in five churches in the morning, in one in the afternoon, and in four at night. Large congregations were present at all of the churches except at the Episcopal church in the morning. We were present, and heard the following sermons: the one by Prof. Latimer in the Presbyterian church, which was a very able sermon;—one not made up simply of ideas that lay upon the surface, but one made up of substance—rich ore from the mine of profound thought. Though said not to be equal to some of the efforts of this rising young divine, yet it was one well worthy of the man, and impressed the whole audience with the great truths, and the wealth of knowledge that lie beneath the

surface of each text of God's word. The one by Rev. S. Taylor Martin, at the Episcopal church, from the text, "Quench not the Spirit," was one that, from the first word, held the audience in the closest attention, and was acknowledged by many to be one of the finest preached here during Presbytery. It was one evidently well prepared, abounding with rich ideas, glittering with perfect gems of thought, and marked by earnest, eloquent appeals that touched the heart of his hearers, and carried them along with the charming speaker. The effect of such a sermon could be plainly seen upon the audience at its close.

That by Rev. R. Z. Johnston at the Presbyterian church Sunday night on the conversion of Levi (or Matthew) when asked while sitting at the receipt of custom by Jesus, was one of the most practical sermons on that "mixed subject" of conversion we have ever had the pleasure of listening to, and was highly appreciated and enjoyed by the large audience that filled the church. By those who were present we have heard the sermons by Dr. Parks, Rev.'s E. H. Harding and W. W. Pharr very highly spoken of. In the morning, according to appointment, the Rev. E. H. Harding preached in the Episcopal church. His subject was Faith in our ascended Lord. We were unable to hear his discourse, and therefore will not undertake to give an outline of it, but are informed by those who had the pleasure of being present, that for beauty of style, logical power, and elegance of diction, the sermon preached by Mr. Harding was unsurpassed. His remarks touching the trials and sufferings of St. Paul were in the highest degree sublime, and produced a marked effect upon his hearers. Several afterwards expressed themselves thus: "It was the best sermon I ever heard." Truly, it was a sermon long to be remembered.

By mistake our date on the outside is 31st instead of 27th.

A LITERARY TREAT. Frank Leslie's Sunday Magazine. This valuable monthly has become a general favorite throughout the country. No such publication graced our shores before the great publisher became familiar with the happy thoughts which led him to the enterprise a little over a year ago. Under the able management of its distinguished editor, Dr. C. F. Dennis, like with us in this country, it has become a household name, and there is no doubt whatever but that Frank Leslie's Sunday Magazine will continue to increase in public esteem and patronage until it reaches a circulation unprecedented in the annals of periodical literature.

The May Number of this precious work is now ready. It contains a large variety of articles, home and foreign matters, masterly editorials on timely subjects, stories, poems, paragraphs, music, sermons, with fun, etc., etc., calculated to interest, instruct, and elevate the million of all ages, classes, sects, and beliefs. Its 128 quarto pages teem with matter, both religious and secular, original and selected, non-sectarian and extremely pleasing, illustrated with 100 beautiful engravings. The best living writers and artists contribute to this Magazine. It will be well to send 25 cents for a specimen copy. Annual subscription, \$2.50 in advance. Single numbers, 25 cents, post-paid. Address your orders to Frank Leslie's Publishing House, 53, 55 and 57 Park Place, New York.

Resolved, 1st, That the Presbytery do direct the committee to meet on Tuesday 23d inst., at 10 o'clock, at the office of Deacon John L. Brown, and take measures to inaugurate the scheme of colportage.

2d, That the churches be directed to raise a collection for this object without delay; that the pastors and supplied be urged to secure a liberal and prompt response and forward without delay to the treasurer.

Pending the consideration of these resolutions the Secretary of publication was invited to address the Presbytery, and gave a clear exhibit of the workings of the new policy, and expressed his gratification at the action taken by the Presbytery on the subject of publication.

A call for the pastoral services of Rev. W. H. Davis from Davidson River church was placed in his hands and accepted.

The Presbytery then dissolved the pastoral relations between Rev. W. H. Davis and Sharon church.

On motion of Rev. W. E. McIlwaine a standing committee on the state of religion in the churches was appointed. The committee consists of Revs. Martin, Davis and Chester.

On motion of Rev. John Douglas pastors were directed not to baptize children of parents under charge of other sessions, except in special cases, and then they are required to notify the session which has jurisdiction over them.

Rev. E. H. Harding presented the narrative, which was approved and ordered to be forwarded to the General Assembly.

A new assessment was ordered on special assessments for the evangelistic fund.

On motion of Rev. S. T. Martin the action of the Presbytery on the Revised Book of Church Order was reconsidered and amended.

On motion Rev. Dr. Miller was appointed to write to Rev. W. H. Banks a letter, expressive of the sympathy of Presbytery, and the moderator was directed to offer special prayer for Brother Banks in the closing prayer.

At the close of the session the following resolution was adopted:

Resolved, By the Presbytery of Mecklenburg that the thanks of this Presbytery be tendered to the good people of Monroe for the marked kindness and hospitality to the members during our present meeting. To the Methodist, Episcopal and Baptist brethren for the use of their houses of worship. To the Railroad authorities for passing the members for half fare. That this resolution be read from the pulpits of the church and be sent to the papers of Monroe with a request to publish.

J. F. LATIMER, Moderator. J. G. PORTS, Secretary. Monroe, April 23d, 1878.

After which the Presbytery adjourned with prayer by Rev. T. K. Hazen and benediction by the Moderator.

Charlotte Observer: A gentleman writes us from Asheville that some days ago while Mr. Burnette and two others were hunting on Craggy Mountain, they came across a manufactory of national bills of a character not authorized by law. A log house nicely hewed adjoining a shelving rock was well concealed by underbrush and had the appearance of having been occupied several years. The work shop was furnished with a geometrical lathe and other appliances for doing good work. More than one engraver must have had quarters there. The manufacturer of the paper used by them was skilled in his business, as none but an expert could detect any difference between this and that manufactured under government authority. About a rod distant was found a blank book in which was found the names and postoffice addresses of Henry Pennell, Gray, Me.; John Dyer New Orleans, La.; Edw. Waston, Denver, Colorado. With the exception of a number of well used books nothing was found of importance.

By mistake our date on the outside is 31st instead of 27th.

Farm and Household

Sweet Potatoes

L. R. Tanner writes to the Southern Cultivator under date of February 27th, as follows:

After taking eight years to learn to raise sweet potatoes, I thought I would try to help the younger portion of my brother farmers, by telling them how 'tis done.

Supposing that the sweet potatoes of the previous crop are in pumps, i. e. put up in conical shape and covered with straw or corn stalks, and then earth, and then boarded over, I commence in March, by taking off my board cover from my seed pump and let rain on it.

If there is a rainy spell, all right, but if not, water this seed bed thoroughly twice a week. By the first of May your bed will have thousands of plants on it.

Now for the potato patch, as we call it. Plough your intended potato patch two or three times, before setting out drawers, having it in rows. Plough and reverse, getting the soil in fine tilth.

Then the cultivation. Plough to your potatoes all the time, pulling the earth up around the little plants with the hoe the first working; never bar off, thereby saving the small roots which sink potatoes, and saving one-half the ploughing.

In 1875, I made 150 bushels sweet potatoes on one-half acre of land by this mode—giving one hoeing, or pulling up with the hoe, and two ploughings, to the potatoes.

Abandoned at Sea

At all times ships of one kind or another are floating about at sea, abandoned by officers and crew, in what seems a hopeless condition. Some are swimming keel upwards, some are water-logged, but being laden with lumber will not sink, but are driven hither and thither as the wind and waves may direct.

Dr. Pierce: Dear Sir—Your Golden Medical Discovery is the best medicine for coughs, colds, and consumption, I ever knew of. It has saved my life.

A Typographical Marvel. For five successive Sundays the New York Herald has issued what it terms "quintuple sheets," comprising twenty pages of six columns each.

Is Machinery Profitable? The grand display of agricultural machinery at the New York State fair at Rochester, in September last, not only attracted much favorable notice from farmers, but also some adverse criticism from other persons with little experience in the use of machinery.

CHEAP KN SAs LANDS! We own and control the Railway lands of TREGO COUNTY, Kansas, and are selling at a special price of \$125 per acre on easy terms of payment.

WARREN, KEENEY & CO., 106 Dearborn st., Chicago, Ill., or Wa-Keeneey, Trego Co., Kansas.

TUTT'S EXPECTORANT

It is the most genial balsam ever used by a physician. It is composed of the finest and most valuable ingredients, which have a specific effect on the throat and lungs, and is a most powerful expectorant.

What others say about Tutts' Expectorant. Had Asthma Thirty Years.

A Child's Idea of Merit. "Tutts' Expectorant is a family name in my house."

A Doctor's Advice. "I have used Tutts' Pills for many years in my family."

TUTT'S PILLS. "THE TREE IS KNOWN BY ITS FRUIT."

AND A THOUSAND MORE. Sold by druggists. Price 25 cents a box.

TUTT'S HAIR DYE. HIGH TESTIMONY. FROM THE PACIFIC JOURNAL.

NOTICE. U. S. INTERNAL REVENUE SPECIAL TAXES.

Under the Revised Statutes of the United States, Sections 3222, 3227, 3228, and 3229, every person engaged in any business, profession, or employment, which renders him liable to a special tax is required to procure and place and keep conspicuously in his establishment or place of business a stamp of the value of the said special tax for the year beginning May 1, 1878.

Special tax year beginning May 1, 1878. Section 2244, Revised Statutes, designates who are liable to special tax. A return, as prescribed on Form 11, is also required by law of every person liable to special tax as above. Severe penalties are prescribed for non-compliance with the foregoing requirements, or for continuing in business after April 30, 1878, without payment of tax.

Applications should be made to J. J. Mott, Collector of Internal Revenue, at Statesville, Mar. 16th. 30-1/2

Special Notice. ALL PERSONS ARE HEREBY notified that on the 2nd day of May next, I will apply to the People's Bank of Monroe for a new certificate of Deposit in said Bank, in lieu of a certificate issued by said Bank No. 541, dated May 10, 1877, for \$1,119, which has been lost or mislaid, and all persons are hereby forbidden to trade for said lost certificate.

AGENTS WANTED FOR THE PICTORIAL HISTORY OF THE WORLD

Containing full and authentic accounts of every nation of ancient and modern times, and including a history of the rise and fall of the Greek and Roman Empires, the growth of the nations of modern Europe, the middle ages, the renaissance, the feudal system, the reformation, the discovery and settlement of the New World, the history of the colonies, and the history of the United States.

It contains 675 fine historical engravings and 1200 large double column pages, and is the most complete history of the world ever published. It is sold at night. Sent for specimen pages and extra terms to Agents, and see why 50,000 copies have been ordered by other booksellers.

National Publishing Co., Philadelphia, Pa.

BEST Ayer's Sarsaparilla

For Scrofula, and all scrofulous diseases, Erysipelas, Itch, or St. Anthony's Fire, Eruptions and Eruptions of the skin, Ulcerations of the Liver, Stomach, Kidneys, Lungs, Pleurisy, Pustules, Boils, Blotches, Tumors, Tetter, Salt Rheum, Scald Head, Ringworm, Ulcers, Sores, Rheumatism, Neuralgia, Pain in the Bones, Side and Head, Female Weakness, Sterility, Leucorrhoea, arising from internal obstructions, and "Loring" disease, Syphilitic and Mercurial diseases, Dropsy, Dyspepsia, Emaciation, General Debility, and for Purifying the Blood.

This Sarsaparilla is a combination of vegetable alteratives—Sillingia, Marsh-Mallows, and other roots, with a large quantity of Potassium and Iron, and is the most efficacious medicine yet known for the diseases it is intended to cure.

Its ingredients are so skillfully combined, that the full alternative effect of each is secured, and while it is so mild as to be harmless even to children, it is still so effectual as to purge out from the system those impurities and corruptions which develop into loathsome diseases.

The reputation it enjoys is derived from its cures, and the confidence which prominent physicians all over the country repose in it, prove their experience of its usefulness.

Certificates attesting its virtues have accumulated, and are constantly being received, and as many of these cases are publicly known, they furnish convincing evidence of the superiority of this Sarsaparilla over every other alternative medicine. So generally is its superiority to any other medicine known, that we need no more than to assure the public that the best qualities it has ever possessed are strictly maintained.

PREPARED BY DR. J. C. AYER & CO., Lowell, Mass., Sold by all druggists everywhere.
