"Humph!" said a young gentleman at play with a young lady; "I could play the lover better than that myself." "I would like to see you try," was the naive reply.

A young lady who didn't admire the custom in vogue among her sisters of writing a letter and then cross-writing it to illegibility, said she would prefer her epistles "without an over-skirt."

Longphiz is inclined to low spirits at times. In one of these spells, the other day, he grumbled, "This is a dreary world; that's one reason I hate doctors; they helped to bring me into it." A man told his friend that he had joined the army. "What regiment?" his friend asked. "Oh, I don't mean that; I mean the army of the Lord." "Ah, what church?" "The Baptist." "Why," was the reply, "that's not the army; it's the navy."

Are Editor's Rich?

"Editors are usually wealthy," the man with the sample case remarked.

"Yes," the editor said, "they are familiar with all the slang and business phrases of the money market; they write about millions as ordinary talk about dollars; they build railroads, organize mining and magnificent transportation companies with fabulous capital, they declare war without first consulting the Rothschilds; and if all the banks in America were to fail to-morrow they would not be a cent poorer than they are today. Yes, they are rich. They associate with the moneyed classes, they sit down at the table with kings, and sometimes in happier, luckier moments with aces; if you want to borrow money, go to the editor. He will tell you his advertising columns and tell you where you can borrow it. If you have money to loan, rather than see you suffer he will borrow it himself. Rich? He knows the secrets of the money rings; he divulges the plans and the schemes of the heavy operators to the people; he roars himself louder than the bulls, and growls among the bears; his voice is heard in the temples of the money changers asking for money; he writes his little roundelay out on the curbstone, in a melancholy minor key, when he does not get it. Oh, yes, editors are rich. When you want to spend all the money you have in this wide world, go to your lawyer; when you want something done for nothing, like to your newspaper office. Then, when you want to send some man to Congress send your lawyer because you can get along without him."

The editor paused, and the profound, impressive silence filled the air like a dream of peace. He looked around upon his audience. It was asleep.—Modern Argosy.

PAPER PULP.—So much is being said about the paper pulp, which is so extensively used in the manufacture of paper, at this time, that a brief description of making it will be interesting. Any white soft wood may be used. The bark is taken off, the colors, dark and decayed places cut out. It is then put into a large caldron and boiled, which extracts all the glutinous and resin and renders it soft. It is then put on a large stone grinder with water pouring on it all the time. This grindstone wears off all the fibres until they are finer than sawdust, which it at away into a receptacle. The water is drained off by means of a fine sieve, leaving the pulp, which consists of fine fuzz or splinters of wood. It is white, and requires no bleaching or chemicals, but is ready to be mixed with rag pulp or anything else that has strong fibre and will make the proper consistency to make into a paste, after which it is run into paper sheets; whereas rags have to be washed and bleached with chloride of lime, soda, ash, and alum, and such strong chemicals, to take out the color. Then they are picked to pieces and made into pulp. The process by which wood pulp is made is purely mechanical, and as any soft wood, such as cotton-wood and poplar, may be used, it can be made cheap say at about one cent per pound.

CHINESE TRAITS.—Rev. O. C. Wheeler, of San Francisco, has delivered a fiery lecture against the Chinese. He has discovered some peculiar traits in the Chinese mode of robbing their neighbors. "One morning, about two o'clock—it was very dark—a policeman passing along a street in the Chinese settlement, heard, as he thought, a rooster crow on the roof of a house. The noise attracted his attention and he cautiously reconnoitered. He discovered a Chinaman standing up against a chimney on the top of a house, and watched him. It was not long before the Chinaman, peering into the dark in various directions and finding as he supposed, the coast all clear, stepped lightly away from the chimney, slapping his arms against his sides and crowed so very like a cock that the head of a flock in a neighboring roost answered with a real roar. Then another, farther off, hearing him, responded, and others, more distant still, took up the refrain, until every gallant chanticleer, for miles around, had given oral testimony to the elegance of his manners. The thieves knew the neighborhood, even the premises where chickens were kept, but did not know the particular spot where the owner had secured a doze. The programme was this: "A dozen or two of dark lanterns, stationed in different portions of the town, in neighborhoods where chickens were known to be kept. The cocks that 'fell in' to the chorus, whose key-note was given by the Chinaman on the house-top, unwittingly disclosed to the watching thieves the exact places where they and their families had been secreted for the night, and thus enabled the thieves to easily secure and carry them to Chinatown to give cheer to empty stomachs."

HE MADE A MISTAKE.—A few days since at the railroad station while a young couple were awaiting the train, the gentleman was admonished by the biting keen air to protect his neck from a prospective cold, by adding a scarf to his traveling apparel. He opened his traveling bag, took out and arranged about his throat what he supposed to be an embroidered scarf, but was convinced of his error by looking into the glasses after he had seen the quizzing smiles on the faces of the spectators and was completely abashed to find that he had adorned himself with the ornately-clocked stockings of his beautiful and now deeply blushing bride.

WELL ANSWERED.—A newspaper, not having the fear of the profession before its eyes, tells the following illustration of faith divorced from works: A hard-shell preacher was on an Alabama river steamer, in the old days of racing. The Captain, seeing a rival boat half a mile ahead, began to coast, and order tar, pine knots, bacon, etc., to be thrown in, to kindle the fire as hot as possible; and, as the steam got higher and higher, the fatalistic preacher edged his way farther back on deck. The jolly Captain, seeing this, tapped him on the shoulder and said, "Hallo, Brother E.—I thought you was one of them fellers who believes that what is to happen, will happen."

"So I do," said the preacher; "but I'd like to be as near the stern as possible when it does happen!"

THE NEWSPAPER IN A FARMHOUSE. There is force and fact in the following from the Atlanta Ga. Sunny South: "People who live near the great thoroughfares where they have access to two or three dailies and a half-dozen weeklies, do not fully appreciate the value of a newspaper. They come indeed to look upon as necessities, and they would as cheerfully do without their morning meal as their morning mail. But one must be far off in the country, remote from the mad-dog crowd, to realize the full luxury of a newspaper. The farmer who receives but one paper a week, does not glance over its columns hurriedly with an air of impatience, as does your merchant or lawyer. He begins with the beginning and reads on to the close, not permitting a news item or an advertisement to escape his eyes. Then it has to be thumbed by every member of the family, each one looking for things in which he or she is most interested. The grown-up daughter looks for marriage notices and is delighted if the editor has treated them to a love story. The son who is just about to engage in farming with an enthusiasm that will carry him far in advance of his father, reads all the crop reports and has a keen eye for hints about improved modes of culture. The younger members of the family come in for the amusing anecdotes and scraps of fun. All look forward to the day that shall bring the paper with the liveliest interest, and if by some unlucky chance it fails to come, it is a bitter disappointment. One can hardly estimate the amount of information which a paper which is not only read but studied, week by week, spreads before their mental vision, a panorama of the busy world, its fluctuations and its vast concerns. It is the poor man's library, and furnishes as much mental food as he has time to consume and digest. No one who has observed how much those who are far away from the places where men most congregate, value their weekly paper, can fail to join in invoking a blessing on the inventor of this means of intellectual enjoyment."

OWED TO SPRING.

JOHN PHOENIX'S OPINIONS, AS GOOD NOW AS EVER.

Well, spring, you cum at last, hey you? The post-ye yow bin a-sittin' in old winter's lap—how did you get out of yourself? I should think he had your breath A-bell, so cold—but that's the way them old fellers have a-don.

Well, as I was sayin': You cum at last with your "hinky Breech" a-blowin' from the North-west—Waconant or Nabrakky, I a-pow, Great countries for him I lookin'.

Now you cum wen Everybody's feed and korn and things like all bin fed out. Now look at our Kritters, will ya? See our Kat! On the last, a havin' to be stounded by 'em take what you want, a-sittin'! To skelains a weepin' over a trot; A hull trot full of bitter relockachums! A hull trot full of bitter relockachums!

Look at them shepe a-bell in The fens corners a-waitin' for grass! And they've bin a-waitin' some ov them wex! And they wex! Pudd their a-bell "skakin' their los From 'em, 'em 'dantit!" (That thur is from Hamlet, not from Shakespeare's play.) As you see, the wex is a-havin' a good time. The Stumak a-ke. So these shepe will Never open their lonto grass again—no.

See the shepe! A-lenin' on the fence to get! Look at them mity ones "a-bangin' pendin'" onto a-havin' a good time. See a hundin' Gull shoies reguler down to a even Korn bucket full! Yes, that thur yow doin', U Tard, luterin' spring—a hangin' back As you bin a-don!

But now you cum! We feel your cheerin' presenz wen we git round onto the south side of the barn! Look at the hain and heavy to the last, Laid a-ge! We see the horse-radish A-stratin' up alongside the garden! And all the while the wex is a-havin' a good time. The old tea-pot after gartin' round. And all these things make the think you cum As you bin a-don!

Er, as he've said: You spring, a-blowin' up ov yer shorbenings! Jest set it down to havin' 'pol's' ideas, Tho' I hain't taken wen out, yet I low to!

The Story Teller.

A HEROINE OF ROMANCE.

His hair was white as snow, but his round visage was ruddy still, and his black, bead-like eyes glittered as with the fire of youth.

"Captain Dulnare you will never grow old," said his friends, which saying interpreted, meant that he would be hale and hearty to the last, when death would take him suddenly with no worrying prelude of lengthened helpless decline, as might reasonably be expected, as he had already passed his allotted term of three score years and ten.

The beautiful girl at his side was known as his daughter and prospective heiress. Virginia Dulnare was shapely in figure, and not too tall. Her features were exquisite, her lips scarlet, her eyes large and brown, and her silky hair like a fleece of gold.

Just now the young and flushed face was hidden on the old man's knee. "Do you really love the poor fellow whom they call Hugh Girard?" asked Captain Dulnare, in a fond, disappointed whisper.

"Very dearly, papa," was the smothered reply. With both his white withered hands he lifted the dainty, blushing face, and looked steadfastly into the big, wistful, brown eyes.

"Virginia," he said, in those firm, stern tones that no man ever dared to disobey, "it is my wish and will that you marry Sextus Weldon. You think you love another, but at your age love is but a lightning flash of passion and fancy. I know best what will make you happy. Therefore I have chosen your husband for you."

"I distrust and despise Sextus Weldon," returned the girl, passionately, springing to her feet. "It is your money, not me, he cares for." A strange look wavered over the round, ruddy visage of the old gentleman.

"Another romantic hallucination, my child," he said. "The young man idolizes you. Do you think your old father does not know the signs of love? And, my pretty lamb, Sextus is very rich, and I would like to have you the wife of a worthy man when I am gone."

blue-eyed man, but a single gesture of that sealed hand stopped their utterance. He looked into her face. That face was icy white, but the brown eyes were like stars of fire.

"I understand, Virginia," he said, slowly; "they have sold you for gold. You loved me, but you were weak. God help you, darling!"

And so Hugh Girard went his way, and Virginia Dulnare fell on her knees, weeping piteous tears in the twilight dusk.

A strange sound aroused her. They were calling her to her father's chamber.

Trembling, shivering and heart-sick, with a strange, portentous dread heavy on her heart, she obeyed the summons.

Captain Dulnare sat as she had left him, in his easy chair; but the frost-white locks that straggled over the crimson velvet, framed in a bloodless, rigid face.

There was a mournful time—the necessary inquest, the death watch, and the rather pompous funeral—but it passed as all things of anguish and delight must pass in this world of chances.

Then came the reading of the dead man's will, and the settlement of his financial affairs.

And with these gross matters of business and lucre, there came to the pale stricken Virginia, a terrible disclosure.

Captain Dulnare's large liabilities, secured by heavy mortgages, and his floating debts, swallowed up everything.

The heiress in prospective was utterless penniless. But that was the smallest sorrow. For by papers of proof left, Virginia was declared to be a child of adoption. She had been left when a baby on the rich man's doorstep, and he had reared her as his own.

After three weeks of grievous embarrassment, Virginia was thrust out into the world with no hope except what she had fixed upon Sextus Weldon.

He only came once, and his tones were altered and supercilious. No matter what he said. But Virginia's sweet face flushed, and she tore the betrothal ring from her shaking hand and gave it back to one who was not loth to receive it.

disdain on her lips the girl rejected his suit. "The impudence of the fellow is amusing," laughed Mrs. Champney. "When Capt. Dulnare chose a husband for you, he should have chosen more wisely. I think I shall be a better match-maker, Virgie."

"Are you so anxious to lose me?" asked the girl, with humorous naivete.

Mrs. Champney smoothed her gray tresses, soberly. "Virginia, you must marry sometime, you know. But that is no reason why you shall not still remain my daughter. I only hope that your future husband may prove as good and tender and faithful as your father was. And now put on your hat and shawl, I am going to take you to see the hero of a romance. He is the son of one of the old friends of my school-girl days. Once upon a time we made a foolish compact, that our first son and daughter should become husband and wife."

"Oh!" gasped Virgie, thinking of Hugh Girard, and wondering, with a shudder, if she was to be the victim of match-making all her life.

"Well, this poor fellow fell in love with a beautiful girl, who loved him, but she rejected him for a richer lover. In his despair he left his native place, and in California—that land of gold—he made a fortune. But with money came misery also. He came home, and, it is said to die; Virgie, you are so sweet and winning that I think you can catch this desolate heart in the response, you know. Then the old compact shall not have been made in vain."

Virginia listened with a sinking heart. "I can't marry this man unless he asks me," she returned, bitterly. "He will ask you," was the decisive response, as the big, bald head was reigned up before a fashionable boarding house.

Mrs. Champney led her daughter to a beautiful room on the second floor. "Listen," she said, passing before the door, that was slightly ajar.

"Virgie, my lost love! Virgie—oh, my Virgie!" The color flew into the white cheeks of the astonished girl.

"God bless you for this, mother!" she said, rushing into the room where Hugh Girard lay sick almost unto death.

"I am here, Hugh!" she cried. What words were said in that chamber of illness may not be told.

Virginia came out after half an hour with a contented smile on her sweet young lips.

"He will live!" said her mother, kissing the blushing face.

"Yes," answered Virgie, "he will live for me." And somebody who witnessed the grand wedding that occurred a month later spoke of the lovely bride, Virginia, as a heroine of romance.

W. M. C. WOLF, EDITOR AND PROPRIETOR.

A Word for the Incumbent.

WHAT'S THE MATTER WITH GOV. JARVIS?

Editor Enquirer:

Dear Sir: Be kind enough to give room in your paper to the following letter, which was published from my pen in the Statesville Landmark, in its issue for the 12th of March.

"I ask for light in view of the many hungry hankers after his seat; for, with those rays of vision of mine, which pass the point of my nose, I can only see in him the peerless peace-time governor of the past 25 or 30 years, not only in North Carolina but in the whole country.

"Now by the double-faced God of War, whose name is Janus, this innuendo is too pointless and thin for even the credulous dolts whom demagogues hoodwink and laugh at in their sleeve. The author of this fiction may imagine that he drives in a poisoned stilet; but he only stabs with a boiled carrot. Gov. Jarvis deserves the cordial congratulations of the whole State, instead of the covert sneers of the envious, that his lady is so accomplished and amiable. If she aids him, so much the better; but that he needs it, is not true, as all can testify who, like myself, have listened to many of his impromptu addresses on many topics, not political, and which were refreshingly replete with the soundest of sense, fluently clothed in the most choice and suitable diction.

"The acts and utterances, ambition and experience of any man, as personally affecting him alone, form, too often, a concrete of weak distortion, wholly inadmissible in elucidating rules and matters of general application. I therefore offer a few reasons for holding such views, which, fortunately, are shared by a large class who do not think that a spasmodic upheaval to a brief tenure of public office, is the summum bonum of life.

"Even under monarchical governments, where official position is far less fluctuating than with us, the career of politics, in 'place-seeking,' draws out no aspirants nor advocates from those who are more solicitous for mental peace than for meretricious worldly advancement. The field is narrow, and the combatants fierce; cupidity and shame embitter their exertions; triumph is exposed to acerbity and perpetual irritation; and failure adds the stings of envy to the mortification of defeat.

"The following is from the Wilmington Star, which after reviewing Dr. Grissom's report, says: 'The excellent Superintendent reports: 'The expenditures for the current year have been kept within the appropriation as will be seen by reference to the reports of the Steward and Treasurer. This has been done by a discount upon all the salaries and a part of the wages of the officers and employees of the institution, and the exceedingly cheap prices of provisions and supplies during a large portion of the year.

"The patients have been well cared for, so far as food and clothing are concerned, but have not had the advantages of amusement and recreation that more liberal appropriation would afford.

"There have been no improvements or repairs that could well be deferred and no expenditures that could reasonably be saved.

"The total expenses for the year are \$44,482.22. It is very evident that such an immense structure as the Asylum and its grounds require constantly to be repaired, and this requires money. The appropriations now made will be found insufficient to keep up the needed repairs, and by the time of the assembling of the Legislature in January, 1881, a considerable outlay will have to be made no doubt to restore the building and grounds to the condition they were in when the Star has been a staunch advocate of retrenchment and reform. It has never proposed or favored beginning retrenchment by either lessening the comforts or necessities of the poor, afflicted inmates of our noblest State charity, the Asylum for the Insane. Some of the efforts to cut down expenses illustrate the adage—pennywise and pound foolish. We have observed that when politicians have any schemes to advance they no more consider the cost in dollars and cents than they consider the value on the steeple. The Insane Asylum is a credit to the men who originated it."

"The Boss Snake Story.—There have been a good many of this class of stories told heretofore, and some of them required the exercise of much imagination to conceive and faith to believe in them. But the Newbern Nut Shell publishes a snake story, related by a Craven county Granger, which is such a 'whopper' that it 'takes the cake.' The farmer declared that he had seen an snake swallow two rabbits, one on each side of a rail fence, thereby imprisoning himself for life. He first swallowed one rabbit on one side of the fence and seeing rabbit No. 2 through a crack, darted his head through and 'took him in.' Having a rabbit in each end of him, as it were, it was impossible for him to get his entire body on either side of the fence.

"The last about Grant is that his managers will count noses at Chicago, and if he is not strong enough to go through on the first ballot his name will not be presented to the Convention. We hope a sufficient number of noses can be counted.—Wil. Star.

term, as if effete, to make room for a successor who feels himself a Solon, but whom the retiring man knows will be at the best a tyro for some time.

The rotatory idea of filling offices is an artifice pregnant with mischief, and is scorned by all thinkers, except the 'outs,' who use it as a trap for the thoughtless. If an officer proves negligent, inefficient or malevolent in office, he can be supplanted without reference to rotation.

The inaugural address of Gov. Jarvis was the most sensible, practical, public-spirited and self-abnegating document of the kind I ever read or heard in this or many other States; and he has most faithfully and diligently carried it out in practice.

The great trouble with the malcontents who seek to 'nose' Gov. Jarvis out of his place, that they, or 'other' may 'get away with it,' is that they can find nothing to say against him! For lack of anything tangible, some of them have started the patent fiction that his highly accomplished lady helps him to compose his speeches!

Now by the double-faced God of War, whose name is Janus, this innuendo is too pointless and thin for even the credulous dolts whom demagogues hoodwink and laugh at in their sleeve. The author of this fiction may imagine that he drives in a poisoned stilet; but he only stabs with a boiled carrot. Gov. Jarvis deserves the cordial congratulations of the whole State, instead of the covert sneers of the envious, that his lady is so accomplished and amiable. If she aids him, so much the better; but that he needs it, is not true, as all can testify who, like myself, have listened to many of his impromptu addresses on many topics, not political, and which were refreshingly replete with the soundest of sense, fluently clothed in the most choice and suitable diction.

Any way, the duties of Governor are realistic, not dramatic and stagey. Those with a talent or penchant rather for graceful or flippant oratory, do not require much thought nor experience to mould it into a shape that will suit any assembly; but little more is required of them than far, than can be learned from books. But a very different study with a far longer and broader experience is necessary to make even the most sagacious person an able governor and counselor for the whole people in difficult emergencies; and this Governor Jarvis has shown himself to be very thoroughly and abundantly.

Very respectfully,
JOHN TRUEMAN.

The Insane Asylum.

The following is from the Wilmington Star, which after reviewing Dr. Grissom's report, says: 'The excellent Superintendent reports:

"The expenditures for the current year have been kept within the appropriation as will be seen by reference to the reports of the Steward and Treasurer. This has been done by a discount upon all the salaries and a part of the wages of the officers and employees of the institution, and the exceedingly cheap prices of provisions and supplies during a large portion of the year.

"The patients have been well cared for, so far as food and clothing are concerned, but have not had the advantages of amusement and recreation that more liberal appropriation would afford.

"There have been no improvements or repairs that could well be deferred and no expenditures that could reasonably be saved.

"The total expenses for the year are \$44,482.22. It is very evident that such an immense structure as the Asylum and its grounds require constantly to be repaired, and this requires money. The appropriations now made will be found insufficient to keep up the needed repairs, and by the time of the assembling of the Legislature in January, 1881, a considerable outlay will have to be made no doubt to restore the building and grounds to the condition they were in when the Star has been a staunch advocate of retrenchment and reform. It has never proposed or favored beginning retrenchment by either lessening the comforts or necessities of the poor, afflicted inmates of our noblest State charity, the Asylum for the Insane. Some of the efforts to cut down expenses illustrate the adage—pennywise and pound foolish. We have observed that when politicians have any schemes to advance they no more consider the cost in dollars and cents than they consider the value on the steeple. The Insane Asylum is a credit to the men who originated it."

"The Boss Snake Story.—There have been a good many of this class of stories told heretofore, and some of them required the exercise of much imagination to conceive and faith to believe in them. The Necessity of Education.

The graded school system is being agitated by the press of Charlotte, and the Observer in particular is doing good service in that ennobling cause. Our esteemed cotemporary says:

"The necessity for public education of the youth of the country, like Bannquo's ghost will not 'down' at any man's bidding, and it will not do to say that this is the poor man's measure. The richest man in every community is, or ought to be, as much in favor of the general education of the masses of the people, as the poorest vagabond on the streets. In fact it has been the experience of the people of both the North and the West, where public education has become a part of the government of the States, that public schools are a failure as long as they are carried on for the benefit exclusively of the poor, but that success in the highest degree comes, when through the better classes of the people the standards of the schools are raised, and they are favored by all classes of the people.

A common maxim now is that public schools must be of sufficiently high grade to attract all classes of society, to make their benefits commensurate with their cost. Because this is not so, the public schools of North Carolina, as they are now carried on, may be said to be failures in every sense of the word.

According to the estimate made by Maj. Robert Bingham some years ago there were only two hundred and fifty students at college in North Carolina, out of the two hundred thousand young men and girls in the State whose ages would imply that they ought to be enjoying the advantages of colleges, and not one young person in fifty was attending the higher classes of our schools, and the census of 1870 revealed the fact that there were more persons in North Carolina, over the age of 21, that could neither read nor write than any State in the Union.

Such facts are a lasting shame and disgrace to the past history of North Carolina, and a blot on our civilization. Shall we sit down quietly until the juggernaut of progress shall have crushed out the little spark of vitality which we still have left?

No! Let us have the schools and colleges, reaching through all classes of society, and from the old field school to the collegiate grade, and because of the training influence that they exert in behalf of the best interests of society, and then let the management of these schools be in the hands of the most capable men, assisted if you please by the most capable women in community; to accomplish which every man should realize, to a certain extent, that a certain amount of responsibility rests on his own shoulders."

Presidential Timber.

Simultaneously with the announcement made in the Boston Post that Mr. Tilden has withdrawn and 'does not care any longer either for politics or politicians,' comes the news from Louisiana, says the Raleigh Observer, which gives that State in the Democratic National Convention to Hancock, with a very strong sentiment prevailing against Mr. Tilden.

And in the same breath we have it that both Kentucky and New York, which had been regarded as sure to be carried in Mr. Tilden's interest, are now doubtful as to him, there being a strong movement in New York favorable to Gov. Seymour and in Kentucky adverse to the Courier-Journal, which is the recognized exponent of Governor Tilden's views in that State. The chief interest in Democratic circles is, however just now centered in Pennsylvania, where the fight is going on between the Hancock men and Governor Tilden, with quite an uproar. In the meantime, Judge Field is getting a little boom because of the probability of his being able to carry both California and Oregon, which with the pronounced Democratic States would secure an election.

In Republican circles, it seems to be understood that Sherman has lost ground very perceptibly, while Blaine is making great inroads in Grant's strength in Illinois and other Western States. It is noteworthy also that Ohio is again becoming to be considered as a doubtful State, and the prospects are good for us to win her from her radical allegiance if Sherman should be defeated.

There is an increasing change going on in the picture, and as far as we can see the Republicans have been losing of late rather than gaining ground, as they anticipated. If now the Democrats in Congress will be wise, and forbear to stir those matters which always irritate the North and arouse sectional jealousies against the South, we will have as fair a chance to win as we had in 1876, when we fairly swept the country. But will wisdom prevail?

A PUZZLED REM.—While Jackson's corps was cautiously moving to the flank and rear of the Union army at Cavalloville, the Confederate cavalry in advance became engaged with the enemy. Soon a wounded and bleeding trooper was seen emerging from the woods in front. After looking around, he moved in the direction from which the infantry were marching, as if seeking the rear, or, as the average gray-jacket would say, the rear. Soon after rapid firing explained that the blue jackets had closed in behind Jackson, and it was not long before the poor cavalryman was seen coming back again. When opposite the 'Stone-wall' another cavalryman from the front also arrived. No. 1 at once recognized him and said: 'Hallo, Bill—wounded?' 'Yes,' said No. 2, 'but not bad. Let's get to the rear.' At which No. 1 exclaimed: 'This is the blameworthy fight I've been in yet. It ain't got no 'r.'

Political Notes.

—Oregon Democrats in State Convention last week endorsed Tilden and Hendricks and appointed six Tilden delegates to the Chicago Convention.

—The Hon. William H. English, of Indiana, says he does not want to be Vice-President, but would be willing to accept the Presidency, or the Secretaryship of the Treasury, or the United States Senatorship.

—The Republican State Convention of Connecticut sends unopposed delegates to Chicago. Of the delegates, five are believed to favor Senator Blaine, four ex-Minister Washburne and three Senator Edmunds.

—Rhode Island last week elected a Legislature almost unanimously Radical and will return Gen. Burnside to the Senate. The Radical candidate for Governor received a large plurality, but failed of election by the people. The Legislature will choose him.

LOUISIANA FOR HANCOCK.—New Orleans April 12.—The Democratic Convention to nominate delegates to Cincinnati met this morning. A resolution was adopted favoring General Winfield S. Hancock for President, but the delegates go unopposed, except to vote as the majority thereof may decide, and for the maintenance of the two-thirds rule.

—Baltimore Sun: Now that the Legislature has passed away, the next excitement will be in preparing for the approaching presidential contest. The names of Tilden and Hancock have been prominently in the foreground by friends in the State, but Bayard seems now to be the first choice. At least it is highly probable that the Maryland delegation will declare for him even if he develops strength enough to claim earnest support.

—New Hanover's Democratic County Convention is to meet on Saturday the 17th, and elections of delegates were held on Friday last. The Congressional matter excited great interest. Major Stedman's friends elected 83 delegates and Col. Waddell's 8 delegates. In the city of Wilmington Major Stedman carried 4 wards and 20 delegates. The vote was large and close, Major Stedman receiving 525 votes, and Col. Waddell 486 votes.

TILDEN DECLINES.—Philadelphia Apr. 14.—The Bulletin's Washington correspondent says he is informed to-day by a prominent Democrat, who has held a high position in the councils of his party, that Mr. Tilden has written a letter to be read at the New York Democratic Convention, at Syracuse, declining to be a candidate before the Cincinnati Convention, and withdrawing his name. The reason assigned for his course is the condition of his health. The same gentleman says Mr. Tilden prepared the letter two months ago withdrawing his name but, the intervention of personal friends prevented it from being made public.

While the hope of uniting the opposing factions of the New York Democracy grows dimmer with the approach of the Syracuse convention, there is every reason to believe that the division in the party, in Pennsylvania, will be bridged over, and that speedily. For some time past the Randall and Wallace factions have been at war, and oftentimes with no good results. In view, however, of the approaching struggle, patriotic men of both sides have come forward and arranged for a meeting, at which it is believed all differences will be adjusted. This will be the beginning of a movement which will unite the party all over the country. Whatever may not be accomplished at present in this direction, will be completed when the nomination of Grant becomes a fact.

It is true Mr. Seymour is not a candidate; but his nomination is so desirable, and the reasons for it so overwhelming, that it seems to be well-nigh impossible to prevent his countrymen from pressing him into their service. The papers, especially the Republican papers, declare day after day that he can't run and won't run, and don't want to run, and won't be forced to run, and yet the people never cease calling for him. In Syracuse, New York, last Saturday, Mr. Tilden met a disastrous defeat. The Herald's account of the meetings states that the Tilden men acted very badly, and winds up as follows: 'The anti-Tilden men are to hang a banner over Salina street next week bearing this legend: "For President, Horatio Seymour." He is the people's choice. To him they turn whenever they feel the necessity for an invincible candidate, as the Syracuse Democrats felt last Saturday.—Richmond Dispatch Dem.

—The Charlotte Observer raises to its head mast, Hon. Horatio Seymour, of New York, for President, and Hon. Wm. H. English, of Indiana, for Vice-President. In making this announcement the Observer goes on to say:

We present this ticket with the full assurance, that it will be the strongest ticket which can be offered to the Democracy of the nation. When we first suggested the names we said, and now we repeat, with 'this ticket the Democracy of the nation can win, because they are comparatively out of politics now because they have not been willing to enter the political hustings and scramble for party favors, but both, if nominated, will bring into the campaign record and characters that will prove invincible at the grand assize. No stain has ever tarnished the political or personal character of either, and both of them stand to day, honored by their friends and respected by their enemies conspicuous exemplars of American statesmanship.

General News.

YELLOW FEVER.—Washington, April 12.—Official advice of the national board of health show that during four week's ending March 27th there had been eleven deaths from malignant yellow fever in New Orleans and 2 in Memphis.

THE DARKEY AHKAD.—They have just had another walking match in New York between a negro named Hart and four or five white men. Hart beat the whole crowd in a six days' walk, and made the fastest time on record, having walked 565 miles in the six days. The gate money paid by visitors is said to amount to \$50,000. Hart gets about \$17,000 for his share. The next best was also a negro named Pegram.

—The Greensboro State learns that a train of cars, running at the rate of 25 miles per hour, was stopped suddenly by the force of the wind, on Sunday morning last, in the neighborhood of Toscoo, on the Air-Line Railroad, some 90 miles south of Charlotte. The train was within 100 yards of a wash-out caused by a severe rain, and had the train not been stopped by the wind, the cars would have gone down an embankment 75 to 100 feet deep.

—The prospect is that Congress will adopt a two-cent postal card. The House Committee on Post Offices have reported favorably. The card is to have a flexible cover to conceal the writing. It is to be of the same size of the one-cent cards. It will not succeed, therefore, letter correspondence, but will answer an end between the card and the letter. People will use it instead of the card when they desire to write about private matters. It will no doubt prove useful, and will increase correspondence probably.

—Another college row is down on the bills. The literary societies of the university at Bloomington, Illinois, prompted by curiosity or devilry—with a remote possibility that they may be honest in their purpose—have invited Jefferson Davis to address them at the June commencement. The faculty, with a cold severity which threatens to take all the fun out of the thing, say they shall forbid the address. Of course, under these circumstances there will be no speech from the ex-President of the Confederacy, but such a splendid opportunity for the regular college-light cannot be overlooked.

—The New York Herald of last Sunday was the most profitable edition of a daily newspaper ever issued in this country; but in addition to its immense array of editorial and other literary contributions, it had 4,448 copies of its advertising columns, the largest number of advertisements ever printed in any one public journal in America. The most remarkable feature of this immense advertising in the Herald, is the fact that it appears almost entirely in supplements, which are, as a rule, thrown away by readers without opening.

Quite a disturbance was created last week by an outrage upon the colored Cadet, Whitaker, who is one of South Carolina's representatives at West Point. He was found on the floor in the barracks, bound hand and foot, with one ear cut off and the other gashed, and his head bruised. His story is that three masked men entered the room during the night, jumped upon him, choked him, and finally tied his feet to the bedstead. One of them then remarked that the proper thing to do was to mark him as they do boys in the South. So they then got to work at his ears. They were making a very pretty Southern outrage of it when Gen. Schaler, who indicated that Whitaker had outraged himself to escape examination and rejection. The Senate is debating the matter and a court martial at West Point is investigating it.

—The election news from Indiana is far from pleasant reading. The Republicans seem to have carried the State for the new constitutional amendment to the election clause by a majority of not less than five thousand. This amendment provides for a registry of the voters and was strongly opposed by the Democrats. There seems to have been some ruffianism practiced in the 'exposed' districts, where the new negroes are congregated, by the Republicans and one prominent Democratic leader was roughly handled by the bull-dozers for endeavoring to prevent the negroes from voting illegally. This would seem to indicate that the stalwarts are preparing to carry things in a high-handed manner, and we greatly fear that Indiana, like Ohio, is to uncertainty the Democratic column.

—The work on the tunnel under the North river to connect New York with Jersey City seems to be going forward at a very lively rate, although not much is heard of it. The tunnel will be two miles in length, from Washington square, in New York, to the terminus in Jersey City, and about three-quarters of a mile will be under the river. It will carry a double track, or, rather, will be a double tunnel. Three gangs of men are now employed, and work never stops, day or night. As the mud and rock are taken out the sides of the bore are lined with boiler iron, and inside this a circle of hard bricks three feet thick is laid with cement. Some difficulty is expected when the work reaches the channel of the river, but the engineers have calculated all the possible troubles and are confident of success. It is expected to have the tunnel completed in three years, and then it will be funny to see people whirling over the East river on that great bridge and under North river through the tunnel.

Agricultural.

Fair Weather Farmers.

It is comparatively easy matter to farm in fair weather, and if there were no rainy days, cold, slush and sleet, rural life would be about as near perfect as anything we have in this lower sphere.

But he who takes up the rotation of farming must do it after the style of that interesting ceremony that says, "For better or worse," and must make provision for a great deal of cloudy weather, rain, and snow.

He should have ample shelter for all his stock and storage room for all crops, or both will suffer and the farmer be the loser.

These things add greatly to the expense of farming but they must come or the farmer will see much of his labor go from him for naught.

Thus fact points out why there are so many unsuccessful farmers. They are fair weather men, sailing smoothly enough over a smooth sea, but placed at great disadvantage when the storms and rain come.

Hay, grain, implements, manure, everything, remains out of doors to take the rains. Having made no provision for dry walks about the premises, everybody including wife and daughters, have to plunge through mud and slush as often as the weather is wet.

No wood and kindling stuff are put away at the proper time, and when the storms come there is extra trouble in getting them, wet jackets, wet feet, muddy floors, poor boots, and quite likely, sour tempers to boot.

Stock perhaps has to be fed in the rain, if fed at all, and much of the fodder is trampled in the mud and wasted. No water furrows have been opened in the wheat, oat, and potato fields, and so the water covers the ground till injury is done.

Stock perhaps break into the garden, the orchard, or the barn because some little repairs have been neglected, and more injury is done than would have been paid for the mending thrice over.
