Masonry in Egypt. SOME NEW TESTIMONY AS TO THE CHARACTER OF THE SYMBOLS FOUND AT THE BASE OF THE OBELISK.

WASHINGTON, March 3.—Judge Philip H. Morgan, the newly appointed minister to Mexico, has recently returned from Egypt, where for three years past he has held the position of judge of the International Court.

To a representative of the World Judge Morgan last night spoke very freely regarding the discovery of Masonic emblems in the base of the Egyptian obelisk now being removed by Lieutenant-Commander Goringe.

He was in Egypt at the time of the excitement over the matter, and, in company with prominent members of the Masonic fraternity, he visited the obelisk and examined the emblems.

He says that as soon as the Masons who visited the scene were shown successively the column, square and trowel in the base of the obelisk they pronounced them exact emblems of the Masonic order.

"Not only," said he, "were these things identical with the Masonic emblems of to-day, but they were arranged in precisely the same position in which they would be placed now by a Masonic lodge.

The square was made of much finer stone than the stone used in the other part of the base, and was the only piece that differed in shape from the blocks contained in the base.

The most conclusive feature, however, about the matter was the well-defined and genuine trowel that was found imbedded in one of these stones.

It was of precisely the same form as the trowels now used by Masons. It was made of iron, and although corroded, the shape was well preserved with the exception of a small piece broken off the flange on one side.

"I saw these things myself," said Judge Morgan, "and I have no doubt that they are the signs of Masonry. They were not put there without a purpose, and no one can dispute that they are symbols of something, and in view of their being identical with the Masonic emblems and arranged in precisely the same order, I think that the most natural inference is that the foundation of that obelisk was designed to perpetuate the emblems of Masonry."

Continuing Judge Morgan said: "The importance of this discovery to Masonry rests in the fact that if we assume that the obelisk was erected some thirty years before Christ, Masonry will date back much further than heretofore. If, however, that obelisk was transferred to Alexandria, and re-erected on the same base that had previously been used, and in the same condition that it had existed at Heliopolis, from which it was taken, then it dates back the origin of Masonry to a period beyond our knowledge."

Judge Morgan spoke very highly of Lieutenant-Commander Goringe, whom he regards as a very capable man in scientific engineering. He said that while there had been more or less jealousy on the part of European engineers of Lieutenant-Commander Goringe and a disposition to ridicule him at the start, those, at least, who witnessed his engineering operations were surprised at the simplicity of his methods and the ease with which he handled the huge stone needle.

When Lieutenant-Commander Goringe was in London he endeavored to obtain an insurance on the obelisk, but the English companies would only agree to insure it upon the condition that he would pledge himself to adopt the methods by which the other obelisk had been removed to England in 1877. This he refused to do, saying that he would adopt his own American method, which he thought was the best.

Judge Morgan has no doubt that the obelisk will in due time be safely landed in New York.

Quite a Useful Engine.—A young graduate in mechanical engineering of the Polytechnic College, in Philadelphia has recently designed a steam fire engine, especially adapted to small towns, where power can be profitably used for driving grist mill, or saw and sash mill. The machine is without ornaments; it has all the essentials of the best steam fire engines, and it is so arranged that when run into the engine house it can be blocked up, the weight taken off the springs, the pump disconnected, and by a band on the low-hell it can be made to run a set of stone, a planer, or other mills, according to the size of the engine. If an alarm of fire is sounded in the daytime, the belt can be thrown off the blocks knocked out and pump connected in less than ten minutes to tell it, and the engine, with a fire burning steam up, is ready upon arriving at scene of conflagration to go at once into service. If the alarm be at night, the engine is ready to run out, for the fires were "banked" when the miller quit work, the belt thrown off the boiler filled, and every cause of delay removed. The engine being in daily use is always kept in order and ready for service. The stoppage of the mill while the engine is at the fire can occasion but little unusual inconvenience for in such towns, in case of fire, everybody, even the miller, leaves his work and turns out to assist his unfortunate neighbors.

Poetry.

"Strike While the Iron's Hot."

BY JOHN FRANCIS WALKER.

Strike while the iron's hot, Strike—and with a will! He not a shiffling fellow, Who takes the iron chill.

Strike while the iron's hot, Strike—and with a will! He not a shiffling fellow, Who takes the iron chill.

Strike while the iron's hot, Strike—and with a will! He not a shiffling fellow, Who takes the iron chill.

The Story Teller.

CAUGHT IN THE ACT.

It was a bright, clear, cold morning in early December. When Kathie entered the car, there was scarcely a vacant seat to be seen.

There was one stout old gentleman seated alone, but he was next to the aisle, and assumed so deeply absorbed in thought, that Kathie disliked to disturb him.

There was a middle-aged woman, but she had numberless parcels and wraps in the seat beside her, and her appearance, take her all in all, was so forbidding, as she looked fixedly out of the window, that Kathie passed her by.

It was beside a gentleman who sat close to the window, reading a newspaper. "Is that seat engaged?" asked Kathie with timid hesitancy.

"It is not," was the answer, in a pleasant tone, "but," springing up as he spoke, "would you prefer the seat by the window?"

"Oh, no! Thank you! Not at all!" murmured Kathie, and she sat down beside him.

The gentleman turned his attention again to his paper, and Kathie immediately fell to wishing that she had taken the seat by the window.

The gentleman sat at her right hand, her purse was in her cloak pocket, and had not Aunt Kate warned her over and over again, to be on her guard against pickpockets, and declared that they were quite as likely to be young, agreeable, and polite as the reverse?

And was not this person all three! Kathie stole a sly glance at him. His dark eyes were intensely fixed on his newspaper. He was fine-looking, and well dressed, and to all intents, quite oblivious of her existence.

Kathie wondered, demurely, what sort of an expression his face would wear if he knew that any thought he might be a pick-pocket.

She might take her purse and hold it in her hand, but that would seem ostentatious and tiresome; moreover, there would be some time for that when the gentleman—who looked like a gentleman, certainly—should put down his paper, and Kathie could no longer see his hands.

Then Kathie's thoughts slipped into a more agreeable channel. She thought of the Christmas gifts she was going to buy, and of the shopping she would do. It was her first trip to Boston quite alone.

Miscellaneous.

The Magnetic Motor.

REV. JAMES S. LAMAR'S INVENTION—A PATENT OBTAINED—THE POSSIBILITIES OF THE MOTOR IF IT SHOULD PROVE TO BE COMPLETELY SUCCESSFUL.

Rev. James S. Lamar has returned to Augusta from the North, where he has been for a short time past on business connected with his invention—the magnetic motor.

If fully successful, bids fair not only to make the inventor famous but to be productive of immense benefit to the world. The possibilities of its perfection dazzle the imagination.

If it should prove to be what the inventor has reason to believe it will, it is hardly too much to say that it will revolutionize locomotive power in the world. The idea was first suggested to Mr. Lamar about eight months ago, and the initial experiments proved so satisfactory that he proceeded to put the invention in more perfect shape.

The motive power of the magnetic motor is, as its name implies, electricity—that great element which is as yet in its infancy so far as the knowledge of man is concerned.

No cumbersome engine or machine is required in putting the force in practical operation. The power which may run a railroad train, turn the spindles of a factory or propel an ocean steamship across the Atlantic, lies within a wheel.

Two prime constituents are used, viz: permanent and temporary magnets which act upon each other and produce the required motion. The temporary magnets, which are made of soft iron and arranged with the proper regard to polarity, are fastened to the wheel, secured to which is a rim within which the permanent magnets are suspended, also arranged with reference to polarity.

Through the temporary magnets a current of electricity passes, generated by any of the ordinary methods. These permanent and temporary magnets mutually attract and repel each other, producing a sort of quadruplex action.

Thus the temporary magnet is drawn towards the permanent magnet, and at a certain point, by automatic action, the poles are reversed and the temporary magnet is repelled.

The temporary magnets are secured at regular distances to the disk of the wheel and the permanent magnets to the rim at attachment at similar distances, so that the drawing and repellant forces are continuous, thus producing motion. The questions now to be demonstrated are the extent of the power; or which the motor is capable, and the cost of magnetizing the temporary magnets.

A large motor is building in New York, and when it is completed a full and practical test of the value of the invention will be made. Scientific men with whom Mr. Lamar conferred while at the North were much pleased with the motor, and gave the inventor every encouragement.

There have been several magnetic motors invented, but with out exception they are small affairs, none of them using above a few horse power. This is not the case with the magnetic motor.

If perfected to the extent that is expected its power will be unlimited; it could be as large or as small as desired. It can be applied to the largest factory or attached to a sewing machine.

In the case of a factory a dynamo electric machine could be run by water, and thus furnish the electric current, by revolution, at a small cost. Perhaps the most important use, however, to which the motor could be put, would be the propelling of ocean steamships.

Has the reader ever reflected that those immense structures which ply the high seas are obliged to carry a quantity of coal, in itself amounting to a considerable cargo? Such is the case. With the magnetic motor as the propelling power all this space could be utilized for the storage of merchandise, to the profit of the owners of the vessel, leaving out altogether the cost of the coal and the expense of employing men to feed the engine and to dump the ashes.

The danger of fire would be almost altogether obviated, nearly all the burnings at the sea are caused by the engine. Mr. Lamar, whose modesty is proverbial, makes no boast of the future of his invention. He is proceeding quietly but earnestly to demonstrate the premises upon which he was led to invent the motor, to a conclusion. He has every reason to expect that the conclusion will be successful, but until this is demonstrated he makes no confident predictions as to its merits.

Mr. Lamar has always possessed the esteem, respect and friendship of the people of Augusta, and it will be with no small measure of pride that they will witness the success of an invention that promises to be of such great benefit to the world.

Masonry in Egypt.

SOME NEW TESTIMONY AS TO THE CHARACTER OF THE SYMBOLS FOUND AT THE BASE OF THE OBELISK.

WASHINGTON, March 3.—Judge Philip H. Morgan, the newly appointed minister to Mexico, has recently returned from Egypt, where for three years past he has held the position of judge of the International Court.

To a representative of the World Judge Morgan last night spoke very freely regarding the discovery of Masonic emblems in the base of the Egyptian obelisk now being removed by Lieutenant-Commander Goringe.

He was in Egypt at the time of the excitement over the matter, and, in company with prominent members of the Masonic fraternity, he visited the obelisk and examined the emblems.

He says that as soon as the Masons who visited the scene were shown successively the column, square and trowel in the base of the obelisk they pronounced them exact emblems of the Masonic order.

"Not only," said he, "were these things identical with the Masonic emblems of to-day, but they were arranged in precisely the same position in which they would be placed now by a Masonic lodge.

The square was made of much finer stone than the stone used in the other part of the base, and was the only piece that differed in shape from the blocks contained in the base.

The most conclusive feature, however, about the matter was the well-defined and genuine trowel that was found imbedded in one of these stones.

It was of precisely the same form as the trowels now used by Masons. It was made of iron, and although corroded, the shape was well preserved with the exception of a small piece broken off the flange on one side.

"I saw these things myself," said Judge Morgan, "and I have no doubt that they are the signs of Masonry. They were not put there without a purpose, and no one can dispute that they are symbols of something, and in view of their being identical with the Masonic emblems and arranged in precisely the same order, I think that the most natural inference is that the foundation of that obelisk was designed to perpetuate the emblems of Masonry."

Continuing Judge Morgan said: "The importance of this discovery to Masonry rests in the fact that if we assume that the obelisk was erected some thirty years before Christ, Masonry will date back much further than heretofore. If, however, that obelisk was transferred to Alexandria, and re-erected on the same base that had previously been used, and in the same condition that it had existed at Heliopolis, from which it was taken, then it dates back the origin of Masonry to a period beyond our knowledge."

Judge Morgan spoke very highly of Lieutenant-Commander Goringe, whom he regards as a very capable man in scientific engineering. He said that while there had been more or less jealousy on the part of European engineers of Lieutenant-Commander Goringe and a disposition to ridicule him at the start, those, at least, who witnessed his engineering operations were surprised at the simplicity of his methods and the ease with which he handled the huge stone needle.

When Lieutenant-Commander Goringe was in London he endeavored to obtain an insurance on the obelisk, but the English companies would only agree to insure it upon the condition that he would pledge himself to adopt the methods by which the other obelisk had been removed to England in 1877. This he refused to do, saying that he would adopt his own American method, which he thought was the best.

Judge Morgan has no doubt that the obelisk will in due time be safely landed in New York.

Quite a Useful Engine.—A young graduate in mechanical engineering of the Polytechnic College, in Philadelphia has recently designed a steam fire engine, especially adapted to small towns, where power can be profitably used for driving grist mill, or saw and sash mill. The machine is without ornaments; it has all the essentials of the best steam fire engines, and it is so arranged that when run into the engine house it can be blocked up, the weight taken off the springs, the pump disconnected, and by a band on the low-hell it can be made to run a set of stone, a planer, or other mills, according to the size of the engine. If an alarm of fire is sounded in the daytime, the belt can be thrown off the blocks knocked out and pump connected in less than ten minutes to tell it, and the engine, with a fire burning steam up, is ready upon arriving at scene of conflagration to go at once into service. If the alarm be at night, the engine is ready to run out, for the fires were "banked" when the miller quit work, the belt thrown off the boiler filled, and every cause of delay removed. The engine being in daily use is always kept in order and ready for service. The stoppage of the mill while the engine is at the fire can occasion but little unusual inconvenience for in such towns, in case of fire, everybody, even the miller, leaves his work and turns out to assist his unfortunate neighbors.

—Franklin said that rich widows are the only second-hand goods that sell at prime cost. —Detroit Free Press.

Monroe Enquirer.

Monroe, N. C. Saturday, Mar. 13, 1880.

Various and all about.

Muddy.
Plenty of rain.
Spring trade opens auspiciously.
The last of the Cincinnati buggies have been sold.
Mr. Charlie Smith, of Anson, died a few days since.
William Ruffin, son of the late Chief Justice Rufin, is dead.
Oscar Blair says that the top mania has struck the boys in Monroe again.
Revenue officials in different sections are making things lively for dealers in the "crooked."

The Farmer & Mechanic is undoubtedly the newest, sprightliest, and liveliest journal in the State.

Col. L. S. Williams will have a position with Wittkowsky & Baruch while not on duty as Superintendent of Cleveland Springs.

Mrs. Rude is receiving a new stock of millinery goods for the Spring trade. Ladies are invited to call and make early selections.

Five instead of four prisoners escaped from Wadesboro jail; one of them, after remaining out of confinement for a few hours, returned and was re-instated.

Full many a rose is born to blush unseen, and waste its fragrance on the desert air; full many a nip is taken behind the screen, and cloves and coffee too, are eaten there.

A horse race was the amusement for the boys Wednesday. Stakes, \$20. Nothing remarkable in the record of either of the animals. Time not above the popular racers.

One of the chief attractions for the small boy's attention on Depot street Thursday, was a fight between a cow and gander, in which the gander came off victorious.

The 15 puzzle has been puzzling around Monroe for the past ten days, but as yet we have heard of no serious consequences to the brain of those who are investigating, or of any diabolical rule by which the 13-14-15 blocks may be arranged.

We are informed that a respectable farmer of this county, now verging upon three score and ten, has for many years, kept a coffin in his house, and now has his entire burial outfit in readiness for his interment, whenever "his course upon earth has been run."

Our town council should see of that loud-mouthed piece of ass-faceness who goes under the euphonious sobriquet of "Fool Jim Stansell." No less than four persons were insulted by this burly rough last Thursday, who, it seems, is privileged to shout, yell, and disturb the town generally by his indecorous conduct, without the least restraint upon his actions, and without respect or regard for any. Several citizens are complaining of this growing nuisance, which it is high time, should be corrected.

Leander McMann, of Lancaster county, several weeks since, came to Monroe and sold two bales of cotton, sending his two sons who accompanied him, back to their home and mother with a message that he would return in a day or two. Taking the train at this place, he went to Charlotte, was married to a widow lady of respectability, and took up an abode near Winston. His first and lawful wife, becoming alarmed at his absence traced him up, discovered what had occurred, had him arrested, and last week was convicted of bigamy and sentenced to ten years hard labor in the penitentiary.

MARRIED, on the 24th ult., at the residence of the bride's father, by Rev. M. H. Hoyle, Mr. J. Edward Black to Miss M. Lizzie Funderburk. All of Mecklenburg county.

In Buford Township, on the 11th, by Rev. J. B. Bailey, Mr. Judge Belk and Miss Susan Richardson, daughter of J. M. Richardson.

PERSONAL.—We had the pleasure of forming an acquaintance, a few days ago, with Dr. A. L. Montgomery, recently of Concord, who has located in this place, and associated himself as a partner with Dr. W. C. Ramsey. We welcome the Doctor to our town, and trust that he may never have cause to regret that he cast his lot among us.

IMPORTANT.—During the past two weeks, we have written letters enclosing bills to probably one hundred persons who are owing us, and we trust that every one of them will respond soon. WE NEED MONEY—WE NEED IT NOW! Our publishing expenses are heavy, and have to be met promptly. Our paper makers are raising the price of paper, and the increase in the price of all goods and crops, would justify us in raising our prices, but we do not desire to do this, and will not if we can collect when we need it. Therefore, if you would keep down our prices, pay us promptly. We cannot, in view of present high prices all around us, give such extended time on subscriptions as some of our patrons seem to demand, and retain our present prices.

CHILD BURNED.—We regret to learn that the youngest child of Mr. J. J. Pickard, at Hornsboro, was badly burned on the right side of face and head, by falling from a chair to the hearth in front of a fire, on the 3rd inst.

Knights of Honor.

A lodge of Knights of Honor was organized in this place last night by Grand Dictator, Theo. F. Klutz, of Salisbury, with twenty-six members. The following officers were elected: D. A. Covington, Dictator; Rev. J. E. King, Vice-Dictator; A. W. Klutz, Asst. Dictator; A. A. Laney, Past Dictator; W. J. Scroggs, Reporter; M. F. Stone, Fin. Reporter; W. C. Wolfe, Treas.; Rev. J. H. Guinn, Chaplain; J. T. Har, Guide; A. B. Caudle, Guardian; A. Levy, Sentinel; Dr. I. H. Blair, Med. Ex. This Order is growing rapidly throughout the United States, numbering now about 75,000 members. The increase in this State during the last six months only, has been about fifty per cent, and there are now 39 lodges in the State. Up to March 2, 1880, orders have been drawn on the W. & O. B. fund for 1,187 deaths, amounting to \$2,356,093.65. Wherever a lodge is instituted, the Order rapidly grows in favor, and no doubt in a few years every county will have one or more lodges.

Monroe Produce Market.

(Reported Weekly by A. H. Crowell & Son, dealers in General Merchandise and Country Produce.)

Mar. 13, 1880.—Flour from wagons at \$3.00-\$4.00; Corn at 83 cts; Meal at 85 cts; Western Bacon from stores, at 84 cts; Lard from stores at 12 1/2 cts; Beef from wagons 3 1/2 cts, by the quarter; butter at 15 cts; Chickens at 20 cts; Beeswax at 18 cts; Tallow 6 1/2 cts; Feathers, live Geese prime, at 35 cts; Wool, unwashed, 10 cts; Green Hides 4 1/2 cts; Wool, unwashed, 30 cts; Eggs, at 12 1/2 cts; Oats 20 cts; Wheat at \$1.50; Sweet potatoes at 75 cts; Peas 70 cts; Pork 6 1/2 cts; N O Hams 10 cts.

It is not generally known that Monroe has a citizen, in prominent business, who has never taken time, until recently, to take a ride on the C. R. Railway, though the road has been in operation to this point for the past six years.

The transportation offered by a Merchants excursion ticket was too great for him, however, and on last Wednesday he visited Charlotte for the first time in six years.

Monroe also has a merchant who does a large business, who has as yet taken but one trip on the Railroad, that being to Rockingham Court as a witness, a few years ago. Who are they?

THE LITERARY WORLD.—The first number of this Magazine, edited and published by Misses Dickson of this place, was laid on our table last Saturday. We are pleased to see that this new enterprise has received a cordial reception at the hands of the Press of this State, and many complimentary notices have been given, both in regard to the matter contained, and the typographical execution. We wish for it unbounded success. Published monthly. Terms \$2.00 a year. Single copies 20 cts. Address the publishers at Monroe.

Rev. J. Wheeler has this day furnished us a sample of Sherman & Co's Compound Bar Soap, of Marshall Mich., which he has just made for exhibition.

The soap is very firm, and washes clothing without rubbing or pounding. The soap can be made cheap, and in a few minutes. It is the most effective LUNG BALSAM ever offered to sufferers from pulmonary disease.

DR. J. F. HAYWOOD, of New York, voluntarily indorses it.

READ WHAT HE SAYS.—Dear Sir:—During the year 1877 I used one hundred cases of your Compound Bar Soap, and I can say that it is the best soap I ever used. It is the best soap I ever used. It is the best soap I ever used.

A NEWSPAPER PUB. WRITES.

Office, Evening News, Augusta, Ga. I have used your Compound Bar Soap for several years, and I can say that it is the best soap I ever used. It is the best soap I ever used. It is the best soap I ever used.

Had terrible NIGHT SWEATS.

Dr. TUTT'S.—I have been suffering for nearly two years with a severe case of night sweats. I have used your Compound Bar Soap, and I can say that it is the best soap I ever used. It is the best soap I ever used. It is the best soap I ever used.

IMPORTANT QUESTIONS.

Reader, have you caught a cold? Are you unable to raise the phlegm? Have you an irritation in the throat? A sense of oppression on the lungs? If you have any of these symptoms, you are in need of a coughing on lying down? A sharp pain now and then in the region of the heart, shortness and back? If so, our Advice is take at once a course of TUTT'S PILLS. In an hour you will be able to raise the phlegm. In an hour you will be able to raise the phlegm. In an hour you will be able to raise the phlegm.

A DRAMATIC ENTERTAINMENT will be given at the Monroe High School building on next Friday night, by some of the "colored" boys and a few young ladies. The proceeds will be devoted for educational purposes. Much fun and a pleasant entertainment is promised, and we advise all to go. Tickets for sale at the Drug Stores.

MARRIED, in Sandy Ridge Township, on the 11th inst., by Rev. R. N. Stephenson, Dr. J. W. Stephenson of this place, and Miss Mildred Hudson.

We beg leave to extend our hearty congratulations to the happy pair, and wish for them a long and prosperous life.

The following short letter, from Dr. J. D. Mitchell, a member of the Georgia Legislature and very strong endorsement: "Messrs Hutchison & Bro., I have used your 'Neuralgia' and find it's all you claim—a specific for Neuralgia and Headache. Yours, &c., J. D. Mitchell, M. D. Sold by H. C. Astorick, Jan 24th

Don't fail to read our advertising columns, this week.

A DOUBLE-HEADED MONSTROUS.

Mr. W. J. Oakley tells us that he has recently seen a child in Person with two well developed heads, four hands, two trunks with twenty-four ribs each spinal column with fifty vertebrae—a head at each end, there being two vertebrae between the floating ribs of each trunk; no legs or any signs of them; excretory organs situated longitudinally each side of the umbilicus and each one is of the masculine gender. When it rises upon its hands and attempts to crawl each head is pulling in an opposite direction. It is well and healthy, and was born the 20th of December, 1878, and is the dual son of a young lady of respectability, whose name we withhold for obvious reasons. The Union that produced this peculiar being has not yet given odium to the two interested, although a few know of it. Immediately after its birth, it was put in charge of a wet nurse who was placed in a cabin and enjoined to keep the secret; but she had a particular friend to whom she imparted the news, and that individual gave Mr. Oakley the clue to its whereabouts, and the way to obtain a view of the living curiosity. Each body is independent of the other, so far as hunger, thirst, etc., are concerned; but one does not stay awake longer after the other is asleep. This not only beats the Siamese twins but the world so far as we know.—Correspondence Bal. News.

JOHN SHERMAN'S CHANCES.—Secretary John Sherman, it is stated by his most intimate friends and admirers, is not in the least discouraged nor discouraged by the present outlook. He seems confident that his chances at the Chicago Convention are as good as those of either Grant or Blaine.—He may have abundant reasons for hopefulness, but his chances at present look to us as if they had been struck by lightning, but that he has not yet become aware of the fact. There is certainly a mammoth mud-de in the Radical camp.

Of the seventy delegates from New York to the Chicago Convention, no less than twenty are earnest and outspoken for Blaine. The delegates are all instructed to vote for Grant, but with the intense feeling which has sprung up in that State, and which is continually increasing, it would surprise us but little if the Blaine delegates should bolt their instructions.—Exchange.

NEW ADVERTISEMENTS.

SHOE WORK.

ALEXANDER OLIVER DESIRES TO inform the public that he is prepared at the Harness Shop on the corner of Monroe to make or repair Sewed or Pegged Boots and Shoes in a workmanlike manner.

And at Reduced Prices!

All work warranted to NOT RIP. Give him a trial. mch12,30ft

Dr. TUTT'S Expectorant!

IN 25CTS. AND \$1 BOTTLES. Its properties are Demulcent, Nutritive, Soothing and Healing. Combining all these qualities, it is the most effective LUNG BALSAM ever offered to sufferers from pulmonary disease.

DR. J. F. HAYWOOD, of New York, voluntarily indorses it.

READ WHAT HE SAYS.—Dear Sir:—During the year 1877 I used one hundred cases of your Compound Bar Soap, and I can say that it is the best soap I ever used. It is the best soap I ever used. It is the best soap I ever used.

ORDERS OF PUBLICATION.

Margaret Starnes, vs. Caroline Medlin, et al.

IT APPEARING UPON AFFIDAVIT, and to the satisfaction of the Court, that the heirs-at-law of James Starnes, dec'd, who are parties defendant in the above entitled action, are non-residents of the State of North Carolina,—that they cannot, after due diligence made, be found within the said State of North Carolina,—that no personal service of the summons in the cause can be had upon them, and that they are necessary parties to the foregoing action, which was instituted for the assignment of dower to the Plaintiff. It is therefore, upon motion of Payne & Vann, attorneys for the Plaintiff, ordered by the Court, that publication be made for six successive weeks in the MONROE ENQUIRER, a weekly newspaper published in the town of Monroe, Union County, N. C., notifying said non-resident Defendants of the pendency of this proceeding, which was instituted for assignment to Plaintiff, dower out of lands situate in Union County, N. C., and that they appear before me at my office in the Court-house in Monroe, N. C., within twenty days after the date of this order, and answer or demur to the Petition which has been filed herein, and the same will be heard ex parte and judgment pro confesso rendered as to them.

Done at office in the Court-house in Monroe, N. C., on this 12th day of March, 1880, as is evidenced by my signature and the official seal of this Court.

R. T. McCain, Ex't'r of Wm. E. McCain, vs. Jane F. Flynn, et al.

PUBLICATION OF SUMMONS.

IN the above entitled action, which is a Petition for final settlement, on the part of the Plaintiff, of his intestate's Estate, and for the appointment of a Receiver, the Sheriff having returned upon the Summons that the Defendants, Agnes A. and James Flynn are not to be found in his county, and it appearing to the satisfaction of the Court, upon the oath of R. T. McCain, that these Defendants are non-residents of this State, and when last heard from, were residents of the State of Tennessee; that after diligent search they cannot be found within the limits of this State, and that personal service of the summons in this case cannot be had upon them, and that they are necessary parties to the foregoing action, which was instituted for the settlement of the Estate of the Plaintiff, and for the appointment of a Receiver, and that they appear before me at my office in the Court-house in Monroe, N. C., within twenty days after the date of this order, and answer or demur to the Petition of the Plaintiff filed for the purposes aforesaid; and that if they do not appear within the time, and at the place aforesaid, and plead, answer, or demur to the Petition filed as aforesaid, the same will be heard ex parte as to them, and judgment pro confesso rendered.

Done at my office in the town of Monroe, N. C., under my hand and official seal, this 6th day of March, A. D. 1880.

Ginning and Threshing Machinery

A SPECIALTY.

REPAIRING PROMPTLY AND CAREFULLY DONE.

TALBOTT'S PATENT SPARK ARRESTER,

THE INVENTION OF THE AGE.

Its prominent features are:— It does not destroy the fuel. It does not interfere with cleaning the tubes. It will not choke up, and requires no cleaning. It requires no direct dampers to be opened when relieving steam, dampers being objectionable, as they may be left open, and allow sparks to escape. It requires no water to extinguish the sparks which, by condensation, destroys the draft. Besides, when water is used, neglected, the efficiency is destroyed by evaporation of the water, and the boiler is kept in a state of danger. It is simple and durable and can be relied upon. It can be attached to any boiler. No plunger should be without one of them. Insurance companies will insure gas and burns where the Talbot Engines and spark arresters are used at same rate as charged for water or horse power. Send for illustrated circulars and price list.

ORDER OF PUBLICATION.

Z. Yarbrough, Adm'r Mason J. Richardson, vs. S. D. Richardson, and others.

IT APPEARING UPON AFFIDAVIT, and to the satisfaction of the Court, that the defendants, E. D. Richardson, John W. Short and wife, Mary Short, are non-residents of the State, and are necessary parties to this special proceeding, instituted by the plaintiff for the purpose of obtaining an order of the Court for the sale of the lands of his intestate to constitute assets in his hands for the payment of the debts of his said intestate. It is ordered upon motion of Payne & Vann, attorneys, that publication be made for six successive weeks in the MONROE ENQUIRER, a weekly newspaper published in the town of Monroe, N. C., for six successive weeks, notifying and commanding the said defendants, S. D. Richardson, John W. Short and wife Mary Short, heirs-at-law of Mason J. Richardson, dec'd, to appear before me at my office in the Court-house in Monroe, N. C., within twenty days after the publication of this order, and plead, answer, or demur to the petition filed in this cause, or the same will be heard ex parte and judgment pro confesso rendered as to them.

Given under my hand, and the seal of said Court, this 4th day of Feb'y, 1880.
